ARTICLE 2.6

Classification of Goods and Transposition of Schedules

1. For the purposes of this Agreement, the classification of goods in trade between the Parties shall be governed by each Party's respective tariff nomenclature in conformity with the Harmonized Commodity Description and Coding System (HS). In Annexes II to V (Schedules of Tariff Commitments on Goods) and Appendix 1 (Product Specific Rules) to Annex I (Rules of Origin), the version of the HS and the year shall be indicated.
2. The transposition of the Schedules of tariff commitments and the Product Specific Rules (PSR) as a result of periodic amendments to the HS by the World Customs Organization (WCO) or other technical adjustments in the respective tariff nomenclature shall not impair or nullify commitments including dismantling periods listed in Annexes II to V (Schedules of Tariff Commitments on Goods), and Appendix 1 (Product Specific Rules) to Annex I (Rules of Origin).
3. Pursuant to paragraph 2, the PSR applicable to the corresponding goods under the amended HS by the WCO shall not impair, nullify or render more restrictive the PSR applicable to the original tariff line.
4. Each Party shall notify the other Parties promptly, preferably no later than six months after the entry into force of the transposition of its domestic customs tariff as a result of periodic amendments to the HS by the WCO by providing the transposed tariff commitments under this Agreement and respective HS correlation tables in English. The Parties shall publish the information on transposed tariff commitments under this Agreement. Such information shall, if possible, be in English.
5. On request of one or several Parties, the requested Party shall address any raised concern regarding the other Party's transposed tariff commitments under this Agreement within a reasonable period of time after receiving the request.

¹ Switzerland applies customs duties based on weight and quantity rather than *ad valorem* duties.

6. Parties shall enter into technical exchanges regarding updates of PSR following the periodic amendments to the HS by the WCO. The updates of the PSR accepted by the Parties shall be published by the Parties in English.

ARTICLE 2.7

Import Licensing

1. The WTO Agreement on Import Licensing Procedures applies and is hereby incorporated into and made part of this Agreement, *mutatis mutandis*.

2. The Parties may only adopt or maintain licensing procedures as a condition for importation if other appropriate procedures to achieve an administrative purpose are not reasonably available.

3. No Party shall adopt or maintain import licensing procedures in order to implement a measure that is inconsistent with this Agreement, the GATT 1994 or the WTO Agreement on Trade-Related Investment Measures. A Party adopting non-automatic licensing procedures shall clearly indicate the measure implemented through such licensing procedures.

4. The Parties shall ensure that all automatic and non-automatic import licensing procedures are neutral in application, and administered in a fair, equitable, non-discriminatory, transparent, predictable and least trade-restrictive manner.

5. If a Party has denied an application for an import licence it shall, without undue delay, provide the applicant with a written explanation of the reasons for the denial.

6. Each Party shall provide effective, non-discriminatory and prompt and easily accessible procedures in accordance with its domestic laws and regulations to guarantee the right of appeal against administrative decisions on applications for import licences. Appeal procedures shall include administrative review by the supervising authority or judicial review in accordance with the domestic laws and regulations of each Party. If the denial of an import licence is upheld in an appeal, the Party granting the licence shall provide the applicant with a written justification without undue delay.

7. No application for an import licence shall be refused for minor documentation errors that do not alter the basic data contained therein. Minor documentation errors may include formatting errors, such as the width of a margin or the font used, and spelling errors which are obviously made without fraudulent intent or gross negligence.

8. A Party adopting or amending regulations related to import licensing that are likely to affect trade between the Parties shall promptly notify the other Parties, but no later than 60 days after publication. The notice shall clearly state the purpose of such licensing procedures and any conditions on eligibility for obtaining an import licence. A notification made by a Party in accordance with the WTO Agreement on Import Licensing Procedures shall be deemed equivalent to a notification under this Agreement.

ARTICLE 2.8

Quantitative Restrictions

1. Article XI of the GATT 1994 applies and is hereby incorporated into and made part of this Agreement, *mutatis mutandis*.
2. A Party introducing a measure in accordance with paragraph 2 of Article XI of the GATT 1994 shall promptly notify the Joint Committee. A notification by a Party in accordance with Article XI of the GATT 1994 shall be deemed equivalent to a notification under this Agreement.
3. Any measure applied in accordance with this Article shall be temporary, non-discriminatory, transparent and may not go beyond what is necessary to remedy circumstances described in paragraph 2 of Article XI of the GATT 1994 and may not create unnecessary obstacles to trade between the Parties.

ARTICLE 2.9

Fees and Formalities

Article VIII of the GATT 1994 applies and is hereby incorporated into and made part of this Agreement, *mutatis mutandis*, subject to Article 7 (Fees and Charges) of Annex VI (Trade Facilitation).

ARTICLE 2.10

National Treatment on Internal Taxation and Regulations

Article III of the GATT 1994 applies and is hereby incorporated into and made part of this Agreement, *mutatis mutandis*.

1. The right and obligations of the Parties with respect to subsidies and countervailing measures shall be governed by Articles VI and XVI of the GATT 1994 and the WTO Agreement on Subsidies and Countervailing Measures, except as provided for in paragraph 2.

2. Before a Party initiates an investigation to determine the existence, degree and effect of any alleged subsidy in another Party, as provided for in Article 11 of the WTO Agreement on Subsidies and Countervailing Measures, the Party considering initiating an investigation shall notify in writing the Party whose products are subject to an investigation and allow for a 30-day period for consultations with a view to finding a mutually acceptable solution. Consultations shall take place in the Joint Committee, unless the Parties making and receiving the request for consultations agree otherwise.²

ARTICLE 2.14

Anti-dumping

1. The rights and obligations of the Parties with regard to anti-dumping measures shall be governed by Article VI of the GATT 1994 and the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994 (WTO Anti-dumping Agreement). The Parties shall endeavour to refrain from initiating anti-dumping procedures or applying anti-dumping measures against each other.

2. When a Party receives a properly documented application and before initiating an investigation concerning imports of another Party, the Party shall immediately notify in writing the other Party whose products are allegedly being dumped and allow for a 30-day period for consultations with a view to finding a mutually acceptable solution. Consultations shall take place in the Joint Committee, unless the Parties making and receiving the notifications agree otherwise.³

3. A definitive anti-dumping measure shall be terminated no later than five years from its imposition or from the most recent review, unless the authorities determine, in a review initiated pursuant to Article 11.3 of the WTO Anti-dumping Agreement and notified to the other Parties before that date, that the expiry of the measure would be likely to lead to continuation or recurrence of dumping and injury. The Party applying a definitive anti-dumping measure shall afford adequate opportunity for consultations on issues arising from the expiry review and avoid applying a perpetual measure.

4. No Party shall impose an anti-dumping measure with regard to the same product from the same Party within one year from the termination of an anti-dumping measure or

² It is understood that investigations may be undertaken in parallel with ongoing consultations and that in the absence of a mutually agreed solution each Party retains its rights and obligations under Article VI and XVI of the GATT 1994 and the WTO Agreement on Subsidies and Countervailing Measures.

³ It is understood that investigations may be undertaken in parallel with ongoing consultations and that in the absence of a mutually agreed solution each Party retains its rights and obligations under Article VI of the GATT 1994 and the WTO Agreement on Anti-Dumping Measures.

a determination which resulted in the non-application or revocation of anti-dumping measures.

5. When anti-dumping margins are established, assessed, or reviewed under Articles 2, 9.3, 9.5, and 11 of the WTO Anti-dumping Agreement regardless of the comparison bases under Article 2.4.2 of the WTO Anti-dumping Agreement, all individual margins, whether positive or negative, shall be counted toward the average.

6. If a Party decides to apply an anti-dumping duty, the Party shall apply the “lesser duty” rule by determining a duty which is less than the dumping margin, when such lesser duty would be adequate to remove the injury to the domestic industry.

7. Five years after the entry into force of this Agreement, the Parties shall review the provisions of this Article in the Joint Committee.

ARTICLE 2.15

Global Safeguard Measures

1. The rights and obligations of the Parties with respect to global safeguards shall be governed by Article XIX of the GATT 1994 and the WTO Agreement on Safeguards. In taking measures under these WTO provisions, a Party shall, consistent with its obligations under the WTO Agreements, endeavour to exclude imports of an originating product from one or several Parties if such imports do not in and of themselves cause or threaten to cause serious injury.

2. A Party initiating an investigation to impose global safeguard measures shall immediately inform the Parties concerned and provide adequate opportunity for consultations.

3. No Party shall adopt definitive safeguard measures until 30 days after the offer for consultations was made.

4. A Party adopting global safeguard measures shall impose them in a way that least affects bilateral trade.

ARTICLE 2.16

Bilateral Safeguard Measures

1. Where, as a result of the reduction or elimination of a customs duty under this Agreement, any product originating in a Party is imported into the territory of another Party in such increased quantities, in absolute terms or relative to domestic production, and under such conditions as to constitute a substantial cause of serious injury or threat thereof to the domestic industry of like or directly competitive products in the territory of the importing Party, the importing Party may take bilateral safeguard measures to the minimum extent necessary to remedy or prevent the injury, subject to paragraphs 2 to 10.

2. Bilateral safeguard measures shall only be taken upon clear evidence that increased imports have caused or are threatening to cause serious injury pursuant to an

investigation in accordance with the procedures laid down in the WTO Agreement on Safeguards.

3. The Party intending to take a bilateral safeguard measure pursuant to this Article shall immediately, and in any case before taking a measure, notify the other Parties. The notification shall contain all pertinent information, including evidence of serious injury or threat thereof caused by increased imports, a precise description of the product concerned, and the proposed measure, as well as the proposed date of introduction, expected duration and timetable for the progressive removal of the measure. A Party that may be affected by the bilateral safeguard measure shall be provided an opportunity to consult in order to mutually agree on appropriate trade liberalising compensation in the form of concessions having substantially equivalent trade effects as those resulting from the measure.

4. If the conditions set out in paragraph 1 are met, the importing Party may:

- (a) suspend the further reduction of any rate of customs duty provided for under this agreement for the product; or
- (b) increase the rate of customs duty for the product to a level not to exceed the lesser of:
 - (i) the most-favoured-nation (MFN) rate of duty applied at the time the bilateral safeguard measure is taken; or
 - (ii) the MFN rate of duty applied on the day immediately preceding the entry into force of this Agreement.

5. Bilateral safeguard measures shall be taken for a period not exceeding 18 months. In very exceptional circumstances, after review by the Joint Committee, measures may be taken up to a total maximum period of three years. No bilateral safeguard measures shall be applied to the import of a product, which has previously been subject to such a measure.

6. The Joint Committee shall, within 30 days from the receipt of the notification, examine the information provided under paragraph 3 in order to facilitate a mutually acceptable solution. In the absence of such solution, the importing Party may adopt a bilateral safeguard measure pursuant to paragraph 4 to remedy the problem, and, in the absence of mutually agreed compensation, the Party against whose product the bilateral safeguard measure is taken may take compensatory action. The bilateral safeguard measure and the compensatory action shall be immediately notified to the other Parties. In the selection of the bilateral safeguard measure and the compensatory action, priority must be given to the action or measure which least disturbs the functioning of this Agreement. The Party taking compensatory action shall apply the action only for the minimum period necessary to achieve the substantially equivalent trade effects and in any event, only while the bilateral safeguard measure under paragraph 4 is being applied.

7. Upon the termination of the bilateral safeguard measure, the rate of customs duty shall be the rate which would have been in effect but for the measure.

8. In critical circumstances, where delay would cause damage which would be difficult to repair, a Party may take a provisional bilateral safeguard measure pursuant to

a preliminary determination that there is clear evidence that increased imports constitute a substantial cause of serious injury, or threat thereof, to the domestic industry. The Party intending to take such a measure shall immediately notify the other Parties thereof. Within 30 days from the receipt of the notification, the procedures set out in paragraphs 2 to 6, including for compensatory action, shall be initiated. Any compensation shall be based on the total period of application of the provisional bilateral safeguard measure and of the bilateral safeguard measure.

9. Any provisional bilateral safeguard measure shall be terminated within 200 days at the latest. The period of application of any such provisional bilateral safeguard measure shall be counted as part of the duration, and any extension thereof, of the bilateral safeguard measure, set out in paragraphs 4 and 5 respectively. Any tariff increases shall be promptly refunded if the investigation described in paragraph 2 does not result in a finding that the conditions of paragraph 1 are met.

10. 20 years after entry into force of this Agreement, the Parties shall review whether there is a need to maintain the possibility to take safeguard measures between them. Following the review, the Parties may decide whether they want to apply this Article any longer. If the Parties decide after the first review to maintain this possibility, biennial reviews shall thereafter be conducted by the Joint Committee.

3. The importing Party shall clearly document any corrective actions, timeframes and follow-up procedures in an assessment report. The draft assessment report shall be provided to the exporting Party within 90 days from the audit. The exporting Party may comment on the draft assessment report. Comments made by the exporting Party shall be taken into account in the final assessment report.
4. The costs incurred in carrying out the audit shall be borne by the importing Party, unless otherwise agreed between the importing Party and the exporting Party.

ARTICLE 4.6

Certificates

1. The Parties agree to cooperate to limit the number of model SPS certificates per food category. Official certificates, where required, shall be in line with the principles laid down in international standards.
2. An importing Party which introduces or modifies a certificate shall inform the exporting Party on the proposed new or revised certificate in English as soon as possible. The importing Party shall provide the factual basis and justification of the new or modified certificate and give the exporting Party sufficient time to adapt to the new

requirements.

3. The Parties are encouraged to establish an electronic SPS certification exchange system.

ARTICLE 4.7

Cooperation

1. With a view to increasing mutual understanding of their respective systems and facilitating access to their respective markets, the Parties shall strengthen their cooperation. Such cooperation shall include, but is not limited to, collaboration between the relevant scientific institutions that provide the Parties with scientific advice and risk assessment.
2. Each Party shall make their final SPS measures available to the public. Upon request, a Party shall provide supplementary information regarding import requirements in English.
3. When a Party introduces new SPS measures, the importing Party shall, upon request, and as far as practicable in English, provide the appropriate risk assessment or scientific information that justifies the measure.

ARTICLE 4.8

Movement of Goods

An importing Party shall ensure free movement of goods complying with its relevant sanitary and phytosanitary requirements once placed on its market.

ARTICLE 4.9

Import Checks

1. Each Party shall ensure that import checks applied to imported goods are based on the risks associated with such goods and applied in a non-discriminatory manner. The Parties shall carry out border controls without undue delay and in the least trade restrictive manner.
2. Each Party shall carry out import controls in accordance with international standards.
3. If a Party detains a product at the border due to a perceived risk, it shall take a decision on clearance as soon as possible and shall make every effort to avoid deterioration of perishable goods. That Party shall promptly inform the importer about the factual justification for the detention.
4. If a Party rejects a product at a port of entry, it shall, upon request, provide the exporting Party with the factual basis and scientific justification as soon as possible.

5. If an importing Party prohibits or restricts the importation of a good of an exporting Party on the basis of non-compliance of that good found during an import check, the importing Party shall notify the competent authority, the importer or its representatives of such non-compliance.

6. When the importing Party identifies a significant or recurring sanitary or phytosanitary non-compliance associated with exported consignments, the Parties concerned shall, on request of any of those Parties, discuss the non-compliance to ensure that appropriate remedial actions are taken to avoid such non-compliance.

ARTICLE 4.10

Technical Consultations

1. If a Party considers that an SPS measure of another Party is likely to create, or has created, an obstacle to trade, or raises significant concerns related to this Chapter, it may, through contact points, request technical consultations with the Party concerned with a view to reaching a mutually acceptable solution.

2. The other Party shall respond to such a request within 30 days. Such consultations may be conducted by any agreed method. The Joint Committee shall be informed thereof.

3. The Parties shall make every attempt to address any concerns relating to an SPS measure through technical consultations under this Article.

ARTICLE 4.11

Review

Upon request of a Party, the Parties shall review the measures granted to a third party with whom the Parties have established arrangements concerning SPS measures. The Parties shall agree on an arrangement extending to each other treatment related to SPS measures which all Parties have agreed with a third party.

ARTICLE 4.12

Contact Points and Competent Authorities

1. The Parties shall exchange names and addresses of contact points and Competent Authorities for this Chapter in order to facilitate communication and the exchange of information.

2. Each Party shall notify any substantial change in structure, organisation and division of responsibilities of its competent authorities and contact points to the other Parties.

CHAPTER 5

TRADE IN SERVICES

ARTICLE 5.1

Scope and Coverage

1. This Chapter applies to measures by the Parties affecting trade in services and taken by central, regional or local governments and authorities as well as by non-governmental bodies in the exercise of powers delegated by central, regional or local governments or authorities. It applies to all services sectors.
2. With respect to air transport services, this Chapter shall not apply to measures affecting air traffic rights or measures affecting services directly related to the exercise of air traffic rights, except as provided for in paragraph 3 of the GATS Annex on Air Transport Services. The definitions of paragraph 6 of the GATS Annex on Air Transport Services are hereby incorporated and made part of this Agreement, *mutatis mutandis*.
3. Nothing in this Chapter shall be construed to impose any obligation with respect to government procurement.
4. This Chapter shall not apply to subsidies and grants including government supported loans, guarantees and insurance, provided by a Party or to any conditions attached to the receipt of such subsidies or grants, whether or not such subsidies or grants are offered exclusively to domestic services, service consumers or service suppliers.

ARTICLE 5.2

Definitions

1. For the purposes of this Chapter:
 - (a) “trade in services” is defined as the supply of a service:
 - (i) from the territory of one Party into the territory of another Party;
 - (ii) in the territory of one Party to the service consumer of another Party;
 - (iii) by a service supplier of one Party, through commercial presence in the territory of another Party; or
 - (iv) by a service supplier of one Party, through presence of natural persons of a Party in the territory of another Party;
 - (b) “services” includes any service in any sector except services supplied in the exercise of government authority;

- (c) “a service supplied in the exercise of governmental authority” means any service which is supplied neither on a commercial basis, nor in competition with one or more service suppliers.
- (d) “service supplier” means any person that supplies, or seeks to supply, a service;⁴
- (e) “natural person of another Party” means a natural person who, under the legislation of that other Party, is:

Such treatment shall be extended to the commercial presence through which the service is supplied or sought to be supplied and need not be extended to any other parts of the service supplier located outside the territory where the service is supplied or sought to be supplied.

- (g) “measure” means any measure by a Party, whether in the form of a law, regulation, rule, procedure, decision, administrative action, or any other form;

 - (ii) otherwise, the whole of that service sector, including all of its subsectors;
- (l) “service of another Party” means a service which is supplied:
 - (i) from or in the territory of that other Party, or in the case of maritime transport, by a vessel registered under the laws of that other Party, or by a person of that other Party which supplies the service through the operation of a vessel and/or its use in whole or part; or
 - (ii) in the case of the supply of a service through commercial presence or through the presence of natural persons, by a service supplier of that other Party;
- (m) “monopoly supplier of a service” means any person, public or private, which in the relevant market of the territory of a Party is authorised or established formally or in effect by that Party as the sole supplier of that service;

- (n) “service consumer” means any person that receives or uses a service;
- (o) “person” means either a natural person or a juridical person;
- (p) “juridical person” means any legal entity duly constituted or otherwise organised under applicable law, whether for profit or otherwise, and whether privately-owned or governmentally-owned, including any corporation, trust, partnership, joint venture, sole proprietorship or association;
 - (i) “owned” by persons of a Party if more than 50 per cent of the equity interest in it is beneficially owned by persons of that Party,

ARTICLE 5.3

Most-Favoured-Nation Treatment

1. Without prejudice to measures taken in accordance with Article VII of the GATS, and except as provided for in its List of MFN Exemptions contained in Annex IX (Lists of MFN Exemptions), each Party shall accord immediately and unconditionally, with respect to all measures affecting the supply of services, to services and service suppliers of another Party treatment no less favourable than the treatment it accords to like services and service suppliers of any non-Party.
2. Treatment granted under other existing or future agreements concluded by a Party and compliant with Article V or Article V *bis* of the GATS shall not be subject to paragraph 1.⁵
3. If a Party concludes or amends an agreement referred to in paragraph 2, after the conclusion of this Agreement, it shall notify the other Parties without delay and endeavour to accord to the other Parties treatment no less favourable than that provided under that agreement. The former Party shall, upon request of another Party, negotiate but not be obliged to incorporate into this Agreement treatment no less favourable than that provided under the former agreement.

⁵ For the purposes of this Agreement, this obligation does not cover the notification requirement under GATS Article V, paragraph 7.

4. Nothing in this Chapter shall be so construed as to prevent a Party from conferring or according advantages to adjacent countries in order to facilitate exchanges limited to contiguous zones of services that are both locally produced and consumed.

ARTICLE 5.4

Market Access

1. With respect to market access through the modes of supply identified in subparagraph 1(a) of Article 5.2 (Definitions) of this Chapter, each Party shall accord services and service suppliers of another Party treatment no less favourable than that provided for under the terms, limitations and conditions agreed and specified in its Schedule in Annex VIII (Schedules of Specific Commitments).⁶

2. In sectors where market-access commitments are undertaken, the measures which a Party shall not maintain or adopt either on the basis of a regional subdivision or on the basis of its entire territory, unless otherwise specified in its Schedule, are defined as:

- (a) limitation on the number of service suppliers whether in the form of numerical quotas, monopolies, exclusive service suppliers or the requirements of an economic needs test;
- (b) limitation on the total value of service transactions or assets in the form of numerical quotas or the requirement of an economic needs test;
- (c) limitation on the total number of service operations or on the total quantity of service output expressed in terms of designated numerical units in the form of quotas or the requirement of an economic needs test;⁷
- (d) limitation on the total number of natural persons that may be employed in a particular service sector or that a service supplier may employ and who are necessary for, and directly related to, the supply of a specific service in the form of numerical quotas or the requirement of an economic needs test;
- (e) measures which restrict or require specific types of legal entity or joint venture through which a service supplier may supply a service; and
- (f) limitations on the participation of foreign capital in terms of maximum percentage limit on foreign shareholding or the total value of individual or aggregate foreign investment.

⁶ If a Party undertakes a market-access commitment in relation to the supply of service through the mode of supply referred to in subparagraph 1(a)(i) of Article 5.2 (Definitions) and if the cross-border movement of capital is an essential part of the service itself, that Party is thereby committed to allow such movement of capital. If a Party undertakes a market-access commitment in relation to the supply of a service through the mode of supply referred to in subparagraph 1(a)(iii) of Article 5.2 (Definitions), it is thereby committed to allow related transfers of capital into its territory.

⁷ This subparagraph does not cover measures of a Party which limit inputs for the supply of services.

ARTICLE 5.5

National Treatment

1. Each Party shall, in the sectors inscribed in its Schedule in Annex VIII (Schedules of Specific Commitments), and subject to any conditions and qualifications set out therein, accord to services and service suppliers of another Party, in respect of all measures affecting the supply of services, treatment no less favourable than that it accords to its own like services and service suppliers.⁸
2. A Party may meet the requirement of paragraph 1 by according to services and service suppliers of another Party, either formally identical treatment or formally different treatment to that it accords to its own like services and service suppliers.
3. Formally identical or formally different treatment shall be considered to be less favourable if it modifies the conditions of competition in favour of services or service suppliers of the Party compared to like services or service suppliers of another Party.

ARTICLE 5.6

Additional Commitments

The Parties may negotiate commitments with respect to measures affecting trade in services not subject to scheduling under Articles 5.4 (Market Access) or 5.5 (National Treatment), including those regarding qualifications, standards or licensing matters. Such commitments shall be inscribed in a Party's Schedule in Annex VIII (Schedules of Specific Commitments).

ARTICLE 5.7

Domestic Regulation

1. Each Party shall ensure that all measures of general application affecting trade in services are administered in a reasonable, objective and impartial manner.
2. Each Party shall maintain or institute, as soon as practicable, judicial, arbitral or administrative tribunals or procedures which provide, at the request of an affected service supplier of another Party, for the prompt review of, and where justified, appropriate remedies for, administrative decisions affecting trade in services. Where such procedures are not independent of the agency entrusted with the administrative decision concerned, the Party shall ensure that the procedures in fact provide for an objective and impartial review.
3. Where authorisation is required by a Party for the supply of a service, the competent authorities of that Party shall, within a reasonable period of time after the submission of an application is considered complete under that Party's domestic laws and

⁸ Specific commitments assumed under this Article shall not be construed to require any Party to compensate for any inherent competitive disadvantages which result from the foreign character of the relevant services or service suppliers.

regulations, inform the applicant of the decision concerning the application. At the request of the applicant, the competent authorities of that Party shall provide, without undue delay, information concerning the status of the application.

4. Each Party shall ensure that measures relating to qualification requirements and procedures, technical standards and licensing requirements and procedures, in all services sectors, are based on objective and transparent criteria, such as competence and the ability to supply the service.

5. In sectors in which a Party has undertaken specific commitments, Annex XIV (Domestic Regulation) shall apply.

6. With a view to ensuring that measures relating to qualification requirements and procedures, technical standards and licensing requirements and procedures do not constitute unnecessary barriers to trade in services, the Joint Committee shall take a decision aiming at incorporating into the Agreement any further disciplines developed in the WTO in accordance with paragraph 4 of Article VI of the GATS. The Parties may also, jointly or bilaterally, decide to develop further disciplines.

7. In sectors in which a Party has undertaken specific commitments, pending the entry into force of a decision incorporating WTO disciplines for these sectors pursuant to paragraph 6, and, if agreed between the Parties, disciplines developed jointly or bilaterally under this Agreement pursuant to paragraph 6 that Party shall not apply qualification requirements and procedures, technical standards and licensing requirements and procedures that nullify or impair such specific commitments in a manner which is:

- (a) more burdensome than necessary to ensure the quality of the service; or
- (b) in the case of licensing procedures, in itself a restriction on the supply of the service.

8. In determining whether a Party is in conformity with the obligation under paragraph 7, account shall be taken of international standards of relevant international organisations⁹ applied by that Party.

9. Each Party shall provide for adequate procedures to verify the competence of professionals of another Party.

ARTICLE 5.8

Recognition

1. For the purposes of the fulfilment of its relevant standards or criteria for the authorisation, licensing or certification of service suppliers, each Party shall give due consideration to any requests by another Party to recognise the education or experience obtained, requirements met, or licences or certifications granted in that other Party. Such

⁹ The term “relevant international organisations” refers to international bodies whose membership is open to the relevant bodies of at least all Parties.

recognition may be based upon an agreement or arrangement with that other Party, or otherwise be accorded autonomously.

2. Where a Party recognises, by agreement or arrangement, the education or experience obtained, requirements met, or licences or certifications granted, in the territory of a non-Party, that Party shall afford another Party adequate opportunity to negotiate its accession to such an agreement or arrangement, whether existing or future, or to negotiate a comparable agreement or arrangement with it. Where a Party accords recognition autonomously, it shall afford adequate opportunity for another Party to demonstrate that the education or experience obtained, requirements met, or licences or certifications granted, in the territory of that other Party should also be recognised.

3. Any such agreement or arrangement or autonomous recognition shall be in conformity with the relevant provisions of the WTO Agreement, in particular paragraph 3 of Article VII of the GATS.

ARTICLE 5.9

Movement of Natural Persons

1. This Article applies to measures affecting natural persons who are service suppliers of a Party, and natural persons of a Party who are employed by a service supplier of a Party, with respect to the supply of a service.

2. This Chapter shall not apply to measures affecting natural persons seeking access to the employment market of a Party, nor shall it apply to measures regarding nationality, residence or employment on a permanent basis.

3. Natural persons covered by a specific commitment shall be allowed to supply the service in accordance with the terms of that commitment.

4. This Chapter shall not prevent a Party from applying measures to regulate the entry of natural persons of another Party into, or their temporary stay in, its territory, including those measures necessary to protect the integrity of, and to ensure the orderly movement of natural persons across its borders, provided that such measures are not applied in such a manner as to nullify or impair the benefits accruing to a Party under the terms of a specific commitment.¹⁰

ARTICLE 5.10

Transparency

1. Each Party shall publish promptly and, except in emergency situations, at the latest by the time of their entry into force, all relevant measures of general application which pertain to or affect the operation of this Chapter. International agreements

¹⁰ The sole fact of requiring a visa for natural persons shall not be regarded as nullifying or impairing benefits under a specific commitment.

pertaining to or affecting trade in services to which a Party is a signatory shall also be published.

2. Where publication as referred to in paragraph 1 is not practicable, such information shall be made otherwise publicly available.

3. Nothing in this Chapter shall require a Party to provide confidential information, the disclosure of which would impede law enforcement, or otherwise be contrary to the public interest, or which would prejudice legitimate commercial interests of particular enterprises, public or private.

ARTICLE 5.11

Monopolies and Exclusive Service Suppliers

1. Each Party shall ensure that any monopoly supplier of a service in its territory does not, in the supply of the monopoly service in the relevant market, act in a manner inconsistent with that Party's obligations under Article 5.3 (Most-Favoured-Nation Treatment) and specific commitments.

2. Where a Party's monopoly supplier competes, either directly or through an affiliated company, in the supply of a service outside the scope of its monopoly rights and which is subject to that Party's specific commitments, the Party shall ensure that such a supplier does not abuse its monopoly position to act in its territory in a manner inconsistent with such commitments.

3. The provisions of this Article shall also apply to cases of exclusive service suppliers, where a Party, formally or in effect, authorises or establishes a small number of service suppliers and substantially prevents competition among those suppliers in its territory.

ARTICLE 5.12

Business Practices

1. Parties recognise that certain business practices of service suppliers, other than those falling under Article 5.11 (Monopolies and Exclusive Services Suppliers), may restrain competition and thereby restrict trade in services

2. A Party shall, at the request of another Party, enter into consultations with a view to eliminating practices referred to in paragraph 1. The Party addressed shall accord full and sympathetic consideration to such a request and shall cooperate through the supply of publicly available non-confidential information of relevance to the matter in question. The Party addressed shall also provide other available information to the requesting Party, subject to its domestic laws and regulations and to the conclusion of a satisfactory agreement concerning the safeguarding of its confidentiality by the requesting Party.

ARTICLE 5.13

Payments and Transfers

1. Except under the circumstances envisaged in Article 5.14 (Restrictions to Safeguard the Balance-of-Payments), no Party shall apply restrictions¹¹ on international transfers and payments for current transactions with another Party.¹²
2. Such payments and transfers shall be made in any freely convertible currency at the market rate of exchange prevailing at the time of transfer.
3. Notwithstanding paragraphs 1 and 2, a Party may prevent or delay a transfer through the equitable, non-discriminatory, and good faith application of its domestic laws and regulations relating to, *inter alia*:
 - (a) bankruptcy, insolvency, or the protection of the rights of creditors including employees;
 - (b) issuing, trading, or dealing in securities, futures, options, or derivatives;
 - (c) criminal or penal offences and the recovery of the proceeds of crime;
 - (d) financial reporting or record keeping of transfers when necessary to assist law enforcement or financial regulatory authorities; or
 - (e) ensuring compliance with orders or judgments in judicial or administrative proceedings.
4. Nothing in this Chapter shall affect the rights and obligations of the Parties under the Articles of Agreement of the International Monetary Fund (IMF), including the use of exchange actions which are in conformity with the Articles of Agreement of the IMF, provided that no Party shall impose restrictions on capital transactions inconsistently with its specific commitments regarding such transactions, except under Article 5.14 (Restrictions to Safeguard the Balance-of-Payments) or at the request of the IMF.

ARTICLE 5.14

Restrictions to Safeguard the Balance of Payments

1. In the event of serious balance-of-payments and external financial difficulties or threat thereof,¹³ a Party may adopt or maintain restrictions on trade in services including on payments or transfers for transactions. It is recognised that particular pressures on the balance of payments of a Party in the process of economic development or economic transition may necessitate the use of restrictions to ensure, *inter alia*, the maintenance of

¹¹ Thailand may adopt or maintain any measure relating to Thai Baht for the purpose of preventing speculation on Thai Baht, in accordance with the Exchange Control Act B.E. 2485, the Bank of Thailand Act B.E. 2485, and Bank of Thailand's circulars and guidelines, as amended.

¹² The Parties are of the understanding that a Party may apply restrictions in accordance with the Articles of Agreement of the IMF.

¹³ For greater certainty, this covers situations where, in exceptional circumstances, payments or transfers cause or threaten to cause serious difficulties for macroeconomic management.

a level of financial reserves adequate for the implementation of its programme of economic development or economic transition.

2. The restrictions referred to in paragraph 1:

- (a) shall not discriminate among Parties and non-Parties;
- (b) shall be consistent with the Articles of Agreement of the IMF;
- (c) shall avoid unnecessary damage to the commercial, economic and financial interests of any other WTO Member;
- (d) shall not exceed those necessary to deal with the circumstances described in paragraph 1;
- (e) shall be temporary and be phased out progressively as the situation specified in paragraph 1 improves.

3. In determining the incidence of such restrictions, the Parties may give priority to the supply of services which are more essential to their economic or development programmes. However, such restrictions shall not be adopted or maintained for the purpose of protecting a particular service sector.

4. A Party adopting or maintaining such restrictions shall promptly notify the other Parties thereof.

ARTICLE 5.15

Subsidies

1. Notwithstanding Article 5.1 (Scope and Coverage), a Party which considers that it is adversely affected by a subsidy of another Party may request ad hoc consultations with that Party on such matters. The requested Party shall enter into such consultations.

2. The Parties shall review any disciplines agreed under Article XV of the GATS with a view to incorporating them into this Agreement for the purposes of this Chapter.

ARTICLE 5.16

General Exceptions

Subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where like conditions prevail, or a disguised restriction on trade in services, nothing in this Chapter shall be construed to prevent the adoption or enforcement by a Party of measures:

- (a) necessary to protect public morals or to maintain public order;¹⁴

¹⁴ The public order exception may be invoked only where a genuine and sufficiently serious threat is posed to one of the fundamental interests of society.

- (b) necessary to protect human, animal or plant life or health;¹⁵
- (c) necessary to secure compliance with domestic laws or regulations which are not inconsistent with the provisions of this Agreement including those relating to:
 - (i) the prevention of deceptive and fraudulent practices or to deal with the effects of a default on services contracts;
 - (ii) the protection of the privacy of individuals in relation to the processing and dissemination of personal data and the protection of confidentiality of individual records and accounts; or
 - (iii) safety;
- (d) inconsistent with Article 5.5 (National Treatment), provided that the difference in treatment is aimed at ensuring the equitable or effective¹⁶ imposition or collection of direct taxes in respect of services or service suppliers of other Parties;
- (e) inconsistent with Article 5.3 (Most-Favoured-Nation Treatment), provided that the difference in treatment is the result of an agreement on the avoidance of double taxation or provisions on the avoidance of double taxation in any other international agreement or arrangement by which the Party is bound.

ARTICLE 5.17

Security Exceptions

Nothing in this Chapter shall be construed:

- (a) to require a Party to furnish any information, the disclosure of which it considers contrary to its essential security interests;

¹⁵ For greater certainty, the Parties understand that, to the extent that such measures are otherwise inconsistent with the provisions of this Chapter, the measures referred to in this subparagraph include environmental measures which are necessary to protect human, animal, or plant life or health.

¹⁶ Measures that are aimed at ensuring the equitable or effective imposition or collection of direct taxes include measures taken by a Party under its taxation system which: (i) apply to non-resident service suppliers in recognition of the fact that the tax obligation of non-residents is determined with respect to taxable items sourced or located in the Party's territory; (ii) apply to non-residents in order to ensure the imposition or collection of taxes in the Party's territory; (iii) apply to non-residents or residents in order to prevent the avoidance or evasion of taxes, including compliance measures; (iv) apply to consumers of services supplied in or from the territory of another Party in order to ensure the imposition or collection of taxes on such consumers derived from sources in the Party's territory; (v) distinguish service suppliers subject to tax on worldwide taxable items from other service suppliers, in recognition of the difference in the nature of the tax base between them; or (vi) determine, allocate or apportion income, profit, gain, loss, deduction or credit of resident persons or branches, or between related persons or branches of the same person, in order to safeguard the Party's tax base. Tax terms or concepts in subparagraph (d) of this Article and in this footnote are determined according to tax definitions and concepts, or equivalent or similar definitions and concepts, under the domestic laws and regulations of the Party taking the measure.

- (b) to prevent a Party from taking any action which it considers necessary for the protection of its essential security interests:
 - (i) relating to the supply of services as carried out directly or indirectly for the purpose of provisioning a military establishment;
 - (ii) relating to fissionable and fusionable materials or the materials from which they are derived; or
 - (iii) taken in time of war or other emergency in international relations; or
- (c) to prevent a Party from taking any action in pursuance of its obligations under the United Nations Charter for the maintenance of international peace and security.

ARTICLE 5.18

Schedules of Specific Commitments

1. Each Party shall set out in a Schedule the specific commitments it undertakes under Articles 5.4 (Market Access), 5.5 (National Treatment) and 5.6 (Additional Commitments). With respect to sectors where such commitments are undertaken, each Schedule shall specify:

- (a) terms, limitations and conditions on market access;
- (b) conditions and qualifications on national treatment;
- (c) undertakings relating to additional commitments referred to in Article 5.6 (Additional Commitments); and
- (d) where appropriate, the time frame for implementation of such commitments and the date of entry into force of such commitments.

2. Measures inconsistent with both Articles 5.4 (Market Access) and 5.5 (National Treatment) shall be subject to paragraph 2 of Article XX of the GATS.

3. The Parties' Schedules of Specific Commitments are set out in Annex VIII (Schedules of Specific Commitments).

ARTICLE 5.19

Modification of Schedules

The Parties shall, upon written request by a Party, hold consultations to consider any modification or withdrawal of a specific commitment in the requesting Party's Schedule of Specific Commitments. The consultations shall be held within three months from the receipt of the request. In the consultations, the Parties shall aim to ensure that a general level of mutually advantageous commitments no less favourable to trade than that provided for in the Schedule of Specific Commitments prior to such consultations is

maintained. Modifications of Schedules are subject to the procedures set out in Article 13.1 (Joint Committee).

ARTICLE 5.20

Review

With the objective of further liberalising trade in services between them, the Parties shall review at least every five years, or more frequently if so agreed, their Schedules of Specific Commitments and their Lists of MFN Exemptions, taking into account in particular any autonomous liberalisation and ongoing work in the WTO. The first such review shall take place no later than seven years from the entry into force of this Agreement.

A single arbitration panel shall organise its examination and present its findings and recommendations, if any, to the parties to the disputes in such a manner that the rights which the parties to the disputes would have enjoyed had separate arbitration panels examined the complaints are in no way impaired.

9. If more than one arbitration panel is established to examine the complaints relating to the same matter, the parties to the dispute shall endeavour to ensure that the same individuals serve as members on each of the separate arbitration panels. The members of the arbitration panels shall consult with each other and the parties to the disputes to ensure, to the greatest extent possible, that the timetables for the arbitration panels' processes are harmonised.

10. Where feasible, the arbitration panel referred to in Articles 14.10 (Implementation of the Final Panel Report) and 14.11 (Compensation and Suspension of Concessions or Other Obligations) shall comprise the same arbitrators as the original arbitration panel. 4. If a Third Party provides any submissions or other documents to the arbitration panel, it shall at the same time provide them to the parties to the dispute and any other Third Parties.
5. An arbitration panel may, with the agreement of the parties to the dispute, grant additional or supplemental rights to Third Parties regarding their participation in arbitration panel proceedings.

4. The language of any proceedings shall be English. The venue for the hearings of the arbitration panel shall be decided by agreement between the parties to the dispute. If there is no agreement, the venue shall be decided by the arbitration panel, in consultation with the parties to the dispute. The hearings shall be open to the public to observe, unless the parties to the dispute agree otherwise at the organisational meeting referred to in paragraph 7. For discussions of any confidential information, the hearings shall be closed. The hearings shall be conducted in a manner that seeks to ensure the safety of the arbitration panel proceedings and the protection of personal data and privacy.
5. There shall be no *ex parte* communication with the arbitration panel concerning matters under its consideration.
6. All documents or information submitted by a party to the dispute to the arbitration panel, shall, at the same time, be transmitted by that Party to the other party to the dispute.
7. As soon as practicable after its establishment, the arbitration panel shall convene an organisational meeting with the parties to the dispute to determine the timetable of the arbitration panel proceedings and other organisational matters, including means of submission of documents related to the arbitration panel proceedings.

ARTICLE 14.8

1. The arbitration panel should submit an initial report containing its findings and rulings to the parties to the dispute not later than 120 days from the date of establishment

of the arbitration panel. In cases of urgent matters, including those on perishable goods, the arbitration panel shall endeavour to submit its initial report within 60 days of the date of its establishment. A party to the dispute may submit written comments to the arbitration panel within 15 days from the receipt of the initial report. The arbitration panel should present to the parties to the dispute a final report within 30 days from the submission of the initial report.

2. The final report, as well as any report under Articles 14.10 (Implementation of the Final Panel Report) and 14.11 (Compensation and Suspension of Concessions or Other Obligations), shall be communicated to the Parties and at any time thereafter a party to the dispute may make the final report publicly available subject to the protection of any confidential information contained in the final report.

3. Any ruling of the arbitration panel under any provision of this Chapter shall be final and binding upon the parties to the dispute.

ARTICLE 14.9

Suspension or Termination of Arbitration Panel Proceedings

1. Where the parties to the dispute agree, an arbitration panel may suspend its work at any time for a period not exceeding 12 months. Within this period, the suspended arbitration panel proceedings shall resume on request of a party to the dispute. In the event of such suspension, any relevant period of time for the arbitration panel shall be extended by the period of time that the work was suspended. If the work of an arbitration panel has been suspended for more than 12 months, the arbitration panel's authority for considering the dispute shall lapse, unless the parties to the dispute agree otherwise.

2. The parties to the dispute may agree at any time to terminate the proceedings of an arbitration panel established under this Agreement by jointly notifying in writing the Chairperson of that arbitration panel.

3. An arbitration panel may, at any stage of the proceedings prior to release of the final report, propose that the parties to the dispute seek to settle the dispute amicably.

ARTICLE 14.10

Implementation of the Final Panel Report

1. The Party complained against shall promptly comply with the ruling in the final report. If it is impracticable to comply immediately, the parties to the dispute shall endeavour to agree on a reasonable period of time to do so. In the absence of such agreement within 45 days from the issuance of the final report, a party to the dispute may request the Chairperson of the arbitration panel, by way of notification to the Chairperson and the other party to the dispute, to determine the length of the reasonable period of time, in light of the particular circumstances of the case. Such a request shall be made within 120 days of the date of the issuance of the final report. The Chairperson of the arbitration panel shall present the parties to the dispute with a determination of the reasonable period of time and the reasons for such determination within 60 days from the receipt of that request by the Chairperson.

2. The Party complained against shall notify the other party to the dispute of any measure adopted to comply with the ruling in the final report. It shall include in the notification a detailed description of how the measure ensures compliance sufficient to allow the other party to the dispute to assess the measure.

3. In case of disagreement as to the existence of a measure adopted to comply with the ruling in the final report or to the consistency of that measure with the ruling, such disagreement shall be decided by the same arbitration panel upon the request of a party to the dispute before compensation can be sought or suspension of benefits can be applied in accordance with Article 14.11 (Compensation and Suspension of Concessions or Other Obligations). The request may only be made after the expiry of the period of time established in accordance with paragraph 1 or after a notification made pursuant to paragraph 2, whichever is earlier. The ruling of the arbitration panel should be rendered within 120 days from the receipt of that request.

ARTICLE 14.11

Compensation and Suspension of Concessions or Other Obligations

1. The Party complained against shall, if so requested by the complaining Party, enter into consultations with a view to agreeing on mutually acceptable compensation, if:

- (a) the Party complained against does not comply with the ruling in the final panel report in accordance with paragraph 1 of Article 14.10 (Implementation of the Final Panel Report) or notifies the complaining Party that it does not intend to comply with the ruling in the final panel report; or
- (b) the arbitration panel to which the matter is referred pursuant to paragraph 3 of Article 14.10 (Implementation of the Final Panel Report) rules that the Party complained against has failed to comply with the ruling in the final panel report.

2. If no such agreement has been reached within 30 days from the receipt of the request or the parties to the dispute have agreed on compensation but the Party complained against has failed to observe the terms and conditions of that agreement, the complaining Party shall be entitled to suspend the application of concessions or other obligations at a level equivalent to those affected by a measure or matter that the arbitration panel has determined not to be in conformity with the obligations under this Agreement.

3. In considering what concession or other obligations to suspend, the complaining Party should first seek to suspend concession or other obligations in the same sector or sectors as that in which the arbitration panel has determined that a measure or matter is not in conformity with the obligations under this Agreement. If the complaining Party considers that it is not practicable or effective to suspend concession or other obligations in the same sector or sectors, it may suspend concession or other obligations in other sectors.

4. The complaining Party shall notify the Party complained against of the concession or other obligations which it intends to suspend, indicating the level of the intended suspension, the relevant sector or sectors in which it proposes to suspend such concessions or other obligations, the grounds for such suspension and when suspension will commence. The suspension may take effect 30 days after the date of the receipt of the notification. Within 20 days from the receipt of that notification, the Party complained against may request the original arbitration panel to rule on whether the proposed suspension is in accordance with paragraphs 2 and 3. The suspension shall not commence until the arbitration panel has issued its ruling or where a mutually agreed solution has been reached. The ruling of the arbitration panel should be given within 60 days from the receipt of that request.

5. Compensation and suspension of concessions or other obligations shall be temporary measures. The suspension shall only be applied until the measure found to be inconsistent with this Agreement has been withdrawn or amended so as to bring it into conformity with this Agreement, or a mutually satisfactory solution is reached. Neither compensation nor suspension is preferred to full elimination of the non-conformity as determined in the report of the arbitration panel. Compensation is voluntary and, if granted, shall be consistent with this Agreement.

6. Upon request of a party to the dispute, the original arbitration panel shall rule on the conformity with the final report of any implementing measures adopted after the suspension of concessions or other obligations and, in light of such ruling, whether the suspension of concessions or other obligations should be terminated or modified. The ruling of the arbitration panel should be given within 30 days from the receipt of that request. If the arbitration panel determines that the Party complained against has complied with the ruling in the final panel report, the complaining Party shall promptly terminate the suspension of concessions or other obligations.

ARTICLE 14.12

Time Periods

1. Any time period mentioned in this Chapter may be modified by mutual agreement of the parties to the dispute or extended, upon request of a party to the dispute, by the arbitration panel.

2. If an arbitration panel considers that it cannot comply with a timeframe imposed on it under this Chapter, it shall inform the parties to the dispute in writing and provide an estimate of the additional time required. Any additional time required should not exceed 30 days.

ARTICLE 14.13

Costs

Unless the parties to the dispute agree otherwise, each party to the dispute shall bear its own legal and other costs incurred in relation to the arbitration. Unless the parties to the dispute agree otherwise, the costs of the members of the arbitration panel and other

expenses associated with the arbitration panel proceedings shall be borne by the parties to the dispute in equal shares.

SECTION II

CONCEPT OF “ORIGINATING PRODUCTS”

ARTICLE 2

General Requirements

1. For the purposes of the Agreement, a product shall be considered as originating in a Party if:
 - (a) it has been wholly obtained in a Party, in accordance with Article 3 (Wholly Obtained Products);
 - (b) the non-originating materials used in the working or processing have undergone sufficient working or processing in a Party, in accordance with Article 4 (Sufficient Working or Processing); or
 - (c) it has been produced in a Party exclusively from materials originating in one or more Parties¹.
2. For the purposes of this Annex,
 - (a) the territorial scope shall, unless otherwise specified, include the customs territories of Thailand, Iceland, Norway and Switzerland;
 - (b) in accordance with the Customs Treaty of 1923 between Switzerland and Liechtenstein, Switzerland shall represent Liechtenstein in matters covered therein, and a product originating in Liechtenstein shall be considered originating in Switzerland.

ARTICLE 3

Wholly Obtained Products

1. The following products shall be considered as wholly obtained in a Party:
 - (a) minerals and other naturally occurring substances extracted or taken from its soil, waters, seabed or beneath the seabed there;
 - (b) plants, vegetables, fruits and other vegetable products grown and harvested there;

¹ Products shall also be considered originating in accordance with Article 6 (Accumulation of Origin) or a product manufactured through a combination of two or more of subparagraphs (a) to (c) of Article 2 (General Requirements).

- (c) live animals born and raised there;
- (d) products from live animals raised there;
- (e) products from slaughtered animals born and raised there;
- (f) products obtained by hunting, trapping, fishing or aquaculture conducted there;
- (g) products obtained there by using cell cultures²;
- (h) products falling within Chapters 29 to 39 obtained there by fermentation³;
- (i) products of sea fishing and other marine products taken from the sea outside the territorial waters⁴ of any country, by a vessel registered in a Party and flying its flag, and products manufactured exclusively from such products, on board a factory ship registered in a Party and flying its flag in accordance with international law;
- (j) products extracted from marine soil or sub-soil outside the territorial waters of a Party provided that this Party has the sole rights to exploit that soil or sub-soil;
- (k) waste and scrap resulting from manufacturing operations conducted there;
- (l) used products collected there fit only for the recovery of raw materials and not for their original purpose; or
- (m) products manufactured in a Party exclusively from materials listed in subparagraphs (a) to (l).

ARTICLE 4

Sufficient Working or Processing

1. A product obtained from non-originating materials shall be considered to have undergone sufficient working or processing if the applicable product-specific rule of Appendix 1 (Product-Specific Rules) is fulfilled.
2. Notwithstanding paragraph 1, the operations defined in Article 5 (Insufficient Working or Processing) are considered as insufficient to obtain originating status.
3. The product-specific rules referred to in paragraph 1 indicate the working or processing that must be carried out on non-originating materials used in manufacturing

² For the purposes of this Annex, “cell culture” means a biotechnological process in which human, animal or plant cells are cultivated under controlled conditions (such as defined temperatures, growth medium, gas mixture, pH) outside a living organism.

³ For the purposes of this Annex, “fermentation” means a biotechnological process in which human, animal or plant cells, bacteria, yeasts, fungi or enzymes are used in the production process.

⁴ For the purposes of this Annex, “territorial waters” include both the territorial sea and internal waters.

and concern only such materials. It follows that if a product, which has acquired originating status in a Party in accordance with paragraph 1, is further processed in that Party and used as material in the manufacture of another product, no account shall be taken of the non-originating components of that material.

4. Notwithstanding paragraph 1, non-originating materials that do not undergo the required change in tariff classification or specific process as set out in Appendix 1 (Product-Specific Rules) may be used, provided that their total value does not exceed 15% of the ex-works price of the product.

5. Paragraph 4 shall not apply to originating products which are wholly obtained in a Party in accordance with Article 3 (Wholly Obtained Products). However, if the relevant product-specific rule of Appendix 1 (Product-Specific Rules) foresees a rule where certain materials must be wholly obtained, the tolerance of paragraph 4 may be applied.

6. Where a rule set out in Appendix 1 (Product-Specific Rules) is based on compliance with a sufficient processing threshold or a maximum content of non-originating materials, the value of non-originating materials may be calculated on an average basis over a period of one year in order to take into account the fluctuations in costs or currency rates, subject to the domestic requirements of the exporting Party.

ARTICLE 5

Insufficient Working or Processing

1. Notwithstanding Article 4 (Sufficient Working or Processing), a product shall not be considered as originating, if it has only undergone one or more of the following operations or processes:

- (a) preserving operations to ensure that a product retains its condition during transport and storage;
- (b) freezing or thawing;
- (c) packaging or re-packaging;
- (d) washing, cleaning, removal of dust, oxide, oil, paint or other coverings;
- (e) ironing or pressing of textiles or textile products;
- (f) simple painting or simple polishing;
- (g) husking, partial or total bleaching, polishing, and glazing of cereals and rice;
- (h) colouring of sugar or forming sugar lumps;
- (i) peeling and removal of stones, cores, pips and shells from fruits, nuts and vegetables;
- (j) sharpening, simple grinding or simple cutting;

- (k) sifting, screening, sorting, classifying, grading, matching;
- (l) simple placing in bottles, cans, flasks, bags, cases, boxes, simple fixing on cards or boards and all other simple packaging operations;
- (m) affixing or printing marks, labels, logos and other like distinguishing signs on products or their packaging;
- (n) simple mixing of products, whether or not of different kinds;
- (o) simple assembly of parts of articles to constitute a complete article or disassembly of products into parts; or
- (p) slaughter of animals.

2. For the purposes of paragraph 1, “simple” means operations or processes which need neither special skills nor machines, apparatus or equipment especially produced or installed to carry out the operation or process.

3. All operations or processes carried out on a product in a Party shall be taken into account when determining whether these operations or processes are considered as insufficient working or processing in accordance with paragraph 1.

ARTICLE 6

Accumulation of Origin

1. A product originating in a Party, which is used as material in the manufacture of a product in another Party, shall be considered as originating in the Party where the last operations beyond those referred to in Article 5 (Insufficient Working or Processing) have been carried out.

2. A product originating in a Party, which is exported from one Party to another and does not undergo working or processing beyond those referred to in paragraph 1 of Article 5 (Insufficient Working or Processing), shall retain its origin.

3. Where materials originating in two or more Parties are used in the manufacture of a product and these materials have not undergone any working or processing beyond the operations referred to in Article 5 (Insufficient Working or Processing), the origin of the product is determined by the material with the highest value, or if this cannot be ascertained, with the highest first ascertainable price paid for that material in that Party.

ARTICLE 7

Unit of Qualification

1. For the purposes of determining the originating status, the unit of qualification of a product or material shall be determined in accordance with the Harmonized System.

2. Pursuant to paragraph 1:

- (a) if the products are subject to a change in tariff classification or a specific manufacturing or processing operation set out in Appendix 1 (Product-Specific Rules), packaging materials and containers for retail sale, which are classified with the products pursuant to General Rule 5 of the General Rules for the Interpretation of the Harmonized System (hereinafter referred to as “General Rules”), shall be disregarded. If the products are subject to a value criterion set out in Appendix 1 (Product-Specific Rules), the value of such packaging materials and containers for retail sale shall be taken into account as the value of originating materials of a Party where the products are produced or non-originating materials, as the case may be, in calculating the value criterion;
- (b) packing materials and containers for shipment used to protect products during transportation, other than packaging materials and containers for retail sale, shall be disregarded in determining the origin of the products;
- (c) where a set of articles, in accordance with General Rule 3 of the General Rules, is classified under a single heading, it shall constitute the unit of qualification; and
- (d) where a consignment consists of a number of identical products classified under a single heading or sub-heading of the Harmonized System, each product shall be considered separately.

ARTICLE 8

Accessories, Spare Parts and Tools

1. In determining whether all the non-originating materials used in the manufacturing of products undergo the applicable change in tariff classification or a specific manufacturing or processing operation set out in Appendix 1 (Product-Specific Rules), accessories, spare parts, tools and instruction and information material dispatched with a piece of equipment, machine, apparatus or vehicle, which are part of the normal equipment and included in its ex-works price, and which are not separately invoiced, shall be disregarded.

2. If the products are subject to a value criterion, the value of the accessories, spare parts or tools shall be taken into account as the value of originating materials of a Party where the products are manufactured or non-originating materials, as the case may be, in calculating the value criterion.

ARTICLE 9

Neutral Elements

Neutral elements, which have not entered into the final composition of the product, such as energy and fuel, plant and equipment, or machines and tools, shall not be taken into account when the origin of that product is determined.

ARTICLE 10

Fungible materials

1. If originating and non-originating fungible materials are used in the working or processing of a product, the determination of whether the materials used are originating may be determined on the basis of an inventory management system. This system may be subject to prior authorisation by the competent authority of the exporting Party if required by the domestic laws and regulations of that Party.
2. For the purposes of paragraph 1, “fungible materials” means materials that are of the same kind and commercial quality, with the same technical and physical characteristics, which cannot be distinguished from one another once they are incorporated into the finished product.
3. The inventory management system shall be based on generally accepted accounting principles applicable in the Party where the product is manufactured and ensure that no more final products receive originating status than would have been the case if the materials had been physically segregated.
4. A producer using an inventory management system must keep records of the operation of the system that are necessary for competent authority of the exporting Party to verify compliance with the provisions of this Annex.
5. The authorisation to use an inventory management system may be withdrawn by the competent authority of the exporting Party at any time if the producer makes improper use of it.

SECTION III

TERRITORIAL REQUIREMENTS

ARTICLE 11

Principle of Territoriality

1. The conditions for acquiring originating status set out in Section II (Concept of “Originating Products”) must be fulfilled without any interruption in the territory of a Party.
2. Notwithstanding paragraph 1, if an originating product is returned to the exporting Party after having been exported to a non-Party without having undergone any operation⁵ there, beyond those necessary to preserve its condition, that product shall retain its originating status.
3. The conditions referred to in paragraph 2 shall be considered fulfilled, unless the customs authority of the re-importing Party has reason to believe the contrary. In such case, the customs authority of the re-importing Party may request the importer or his or her representative to provide appropriate evidence of compliance, of any kind, such as sale contracts, invoices or other transport documents, or import/export declarations.
4. If Thailand agrees the possibility for outward processing or similar arrangement with non-Parties in preferential trade agreements concluded after the entry into force of the Agreement, Thailand shall promptly notify the other Parties and enter into negotiations with the other Parties on the possibility to accord no less favourable treatment under the Agreement.

ARTICLE 12

Non-Alteration

1. Originating products, for which preferential tariff treatment is requested in a Party, must not have been altered or transformed in any way prior to being declared for preferential tariff treatment in the importing Party.
2. Notwithstanding paragraph 1, transit, storage and splitting of consignments, operations to preserve the products condition, adding or affixing marks, labels, seals or any documentation to ensure compliance with domestic requirements of the importing Party, may take place in a non-Party, provided the consignments remain under customs control in that non-Party.
3. The conditions referred to in paragraphs 1 and 2 shall be considered fulfilled, unless the customs authority of the importing Party has reason to believe the contrary. In

⁵ The term “any operation” does not include normal use.

such case, the customs authority of the importing Party may request the importer or his or her representative to provide appropriate evidence of compliance, of any kind, such as bills of lading or other transport documents, or marking or numbering of packages.

SECTION IV

PROOF OF ORIGIN

ARTICLE 13

Origin Declaration

1. For the purposes of obtaining preferential tariff treatment in the importing Party, an exporter established in a Party must complete a proof of origin in the form of an origin declaration in accordance with Appendix 2 (Origin Declaration) for products originating in any Party and otherwise fulfilling the requirements of this Annex.
2. The origin declaration must be completed on an invoice or any other commercial document that identifies the exporter and the originating products, and, except as provided for in Article 14 (Approved Exporter), bear the original handwritten signature of the exporter.
3. Notwithstanding paragraph 1, for products being exported from Thailand, an origin declaration is completed by;
 - (a) an approved exporter as provided for in Article 14 (Approved Exporter) for any consignment regardless of its value; or
 - (b) any exporter for a consignment for which the total value of the originating products must not exceed 6,000 Euros or the equivalent in any other currency.

This paragraph shall cease to apply no later than 10 years after entry into force of the Agreement.

4. The origin declaration may be completed when the products to which it relates are exported, or after exportation. An origin declaration shall be valid one year from the date of completion.
5. Subject to the domestic requirements of the exporting Party, forwarding agents, customs brokers and other persons have to be empowered in writing by the exporter of the product to complete origin declarations. They must submit the said authorisation to the competent authorities, at their request.
6. An exporter who has completed an origin declaration must keep a copy of the origin declaration and all documents supporting the originating status of the product, in paper or electronic form, for at least three years from the date of completion.

ARTICLE 14

Approved Exporter

1. The competent authority of the exporting Party may, subject to domestic requirements, authorise an exporter of that Party to complete origin declarations without signature.
2. An exporter who requests such authorisation must offer, to the satisfaction of the competent authority of the exporting Party, all guarantees necessary to verify the originating status of the products as well as the fulfilment of any other requirement under this Annex.
3. In the instance of Thailand as the exporting Party, its competent authority may grant the status of approved exporter subject to any conditions which it considers appropriate. Such conditions include the following:
 - (a) that the exporter is duly registered in accordance with the laws and regulations of Thailand;
 - (b) that the exporter knows and understands the rules of origin as set out in this Annex;
 - (c) that the exporter has a record of good compliance, measured by risk management of the competent authority of Thailand;
 - (d) that the exporter, in the case of a trader, is able to obtain a declaration by the producer confirming the originating status of the good for which the origin declaration is completed by an approved exporter and the readiness of the producer to cooperate in verification in accordance with Article 20 (Verification of Origin Declarations) and meet all requirements of this Annex; and
 - (e) that the exporter has a well-maintained book-keeping and record-keeping system in accordance with the laws and regulations of Thailand.
4. The competent authority of the exporting Party shall:
 - (a) grant the approved exporter authorisation in writing or electronically; and
 - (b) provide the approved exporter an authorisation number which must be included in an origin declaration instead of the signature.
5. An approved exporter in Thailand must:
 - (a) complete an origin declaration only for products for which the approved exporter has been allowed to do so by the competent authority and for which it has all appropriate documents proving the originating status of the products concerned at the time of completing the origin declaration;
 - (b) take full responsibility for all origin declarations completed, including any misuse;

- (c) promptly inform the competent authority of any changes related to the information referred to in subparagraph (a); and
- (d) allow the competent authority access to records and premises for the purposes of monitoring the use of the authorisation and of the correctness of origin declarations completed.

6. The competent authority of the exporting Party may verify the proper use of an authorisation and withdraw it if the exporter no longer meets the conditions or otherwise makes improper use of it.

SECTION V

PREFERENTIAL TREATMENT

ARTICLE 15

Importation Requirements

1. Each Party shall grant preferential tariff treatment in accordance with the Agreement to originating products of a Party imported from another Party, on the basis of an origin declaration in accordance with Article 13 (Origin Declaration).
2. In order to obtain preferential tariff treatment, the importer must, in accordance with the procedures applicable in the importing Party, request preferential tariff treatment at the time of importation of an originating product, whether or not the importer is in possession of an origin declaration.
3. If the importer is not in possession of an origin declaration at the time of importation, the importer may, in accordance with the domestic laws and regulations of the importing Party, present the origin declaration at a later stage.
4. An origin declaration must be submitted to the customs authority of the importing Party within one year from its completion. After this period, an origin declaration may be accepted only in exceptional circumstances.
5. Notwithstanding paragraph 1, a Party may, in accordance with its domestic laws and regulations, waive the requirements to present an origin declaration.
6. An importer who has been granted preferential tariff treatment must keep the origin declaration and other relevant documents for three years after the date on which preferential tariff treatment was granted, or longer if required by the domestic laws and regulations of the importing Party.

ARTICLE 16

Importation by Instalments

Where, at the request of an importer and on conditions laid down by the customs authority of the importing Party, a dismantled or non-assembled product within the meaning of General Rule 2(a) of the General Rules is imported by instalments, an origin declaration may be submitted to the customs authority of the importing Party upon importation of the first instalment or for each imported instalment in accordance with the domestic law and regulations of the importing Party.

ARTICLE 17

Cooperation of Exporters and Importers with the Competent Authorities

1. Exporters and importers benefitting from the Agreement must, within the framework of this Annex and subject to domestic laws and regulations of the Party concerned, cooperate with the competent authority of the exporting Party and the customs authority of the importing Party where they are established and submit, upon their request, supporting documents regarding the fulfilment of the requirements of this Annex.
2. An exporter who has completed an origin declaration must:
 - (a) upon request of the competent authority of the exporting Party, submit the documents referred to in paragraph 5 of Article 13 (Origin Declaration) to this authority, which may, at any time, carry out inspections and verify the exporter's accounts or the producer's accounts and take other appropriate measures; and
 - (b) when becoming aware of or having reason to believe that an origin declaration contains incorrect information, immediately notify the importer and the competent authority of the exporting Party of any change affecting the originating status of each product covered by that origin declaration.
3. An importer who has requested or has been granted preferential tariff treatment must:
 - (a) upon request of the customs authority of the importing Party, submit the documents referred to in paragraph 3 of Article 11 (Principle of Territoriality) and paragraph 3 of Article 12 (Non-Alteration) to that authority; and
 - (b) when becoming aware of or having reason to believe that the origin declaration contains incorrect information, immediately notify the customs authority of the importing Party of any change affecting the originating status of each product covered by an origin declaration.

ARTICLE 18

Denial of Preferential Treatment

1. An importing Party may deny preferential tariff treatment or recover unpaid customs duties in accordance with its domestic laws and regulations where a product does not meet the requirements of this Annex or where the importer or exporter fails to demonstrate compliance with the relevant requirements.
2. Slight discrepancies between the statements made in the origin declaration and those made in other documents submitted to the customs authority of the importing Party for customs clearance or obvious formal errors, such as typing errors in an origin declaration, shall not as such render the origin declaration invalid.

ARTICLE 19

Non-Party Invoicing

The customs authority of the importing Party shall not deny a claim for preferential tariff treatment for the sole reason that an invoice was not issued by the exporter or producer of the products in a Party provided that the products meet the requirements of the Annex.

SECTION VI

ADMINISTRATIVE COOPERATION

ARTICLE 20

Verification of Origin Declarations

1. The competent authority of the exporting Party shall carry out verifications of origin declarations on request of the importing Party. The request and any subsequent communication including the result may be submitted through letter mail or via electronic means.
2. The verification request may question the authenticity of origin declarations, the originating status of the product concerned or the fulfilment of other requirements of this Annex. It shall identify the reasons for the inquiry and include a copy of the origin declaration and, if appropriate, any other document or information giving reason to believe that the origin declaration could be invalid.
3. The importing Party shall submit the verification request to the exporting Party within 34 months from the date of completion of the origin declaration. The exporting Party shall not be obliged to conduct verifications based on verification requests received after the end of that deadline.
4. The customs authority of the importing Party may, subject to its domestic laws and regulations, suspend preferential tariff treatment to a product covered by an origin declaration until the verification procedure has been finalised.
5. The competent authority of the exporting Party may request evidence, carry out inspections at the exporter's premises or producer's premises, check the exporter's accounts and the producer's accounts and take other appropriate measures to verify compliance with this Annex.
6. The requesting Party shall be informed of the results and findings of the verification within nine months from the date of receipt of the verification request. If the requesting Party receives no reply within that time limit, or if the reply does not clearly state whether a product is originating or whether the origin declaration is valid, the requesting Party may deny preferential tariff treatment to the consignment covered by the origin declaration in question.
7. Where the requested Party is unable to comply with the time limit referred to in paragraph 6, it shall, upon request within that time limit, be granted an extension of the time limit.

ARTICLE 21

Notifications and Cooperation

1. The Parties shall provide each other, through letter mail or electronic means, through the EFTA Secretariat, with:

- (a) the physical and electronic addresses of the Parties' competent authorities responsible for verifications in accordance with Article 20 (Verification of Origin Declarations) and other issues related to the implementation or application of this Annex;
- (b) information on the composition of authorisation numbers allocated to approved exporters, in accordance with Article 14 (Approved Exporter). The Parties shall make available to each other an updated list of authorised exporters either on the internet or via email; and
- (c) information on the interpretation, application and administration of this Annex as needed.

2. The Parties shall endeavour to resolve technical matters related to the implementation or application of this Annex, to the extent possible, through direct consultations between the competent authorities referred to in subparagraph 1 (a) or in the Sub-Committee on Trade in Goods. Disputes that cannot be settled through such consultations shall be submitted to the Joint Committee.

ARTICLE 22

Confidentiality

All information provided in relation with this Annex shall be treated as confidential by the Parties in accordance with the domestic laws and regulations of each Party. Such information shall not be disclosed by the authorities of a Party without the express permission of the person or authority providing it.

SECTION VII

FINAL PROVISIONS

ARTICLE 23

Penalties

Each Party shall provide for the imposition of criminal, civil or administrative penalties for violations of its domestic laws and regulations related to this Annex.

ARTICLE 24

Products in Transit or Storage

This Annex may be applied to products which, on the date of entry into force of the Agreement, are either in transit or in temporary storage in a customs warehouse or free zone under customs control in accordance with the domestic laws and regulations of the importing Party. For such products, an origin declaration may be completed retrospectively up to six months from the entry into force of the Agreement, provided that the provisions of this Annex, in particular Article 12 (Non-Alteration), have been fulfilled.

APPENDIX 1 TO ANNEX I
PRODUCT-SPECIFIC RULES

SECTION I

Interpretative Notes

1. The product-specific rules (PSR) of origin set out in this Appendix are based on HS 2022. Column 1 of the list contains chapters, headings, or sub-headings, and column 2 sets out a description of the products. For each entry in columns 1 and 2, one or two rules are specified in columns 3 and 4. If the HS code in column 1 is preceded by an “ex” the rules in columns 3 or 4 apply only to the part of that chapter, heading or sub-heading described in column 2. Where, for an entry in columns 1 and 2, a rule is specified in both columns 3 and 4, either one may be applied. If no origin rule is specified in column 4, the rule set out in column 3 shall be applied.
2. The PSR may be fulfilled by operations in more than one company within a Party if these operations, taken together, fulfil the requirements of Annex I (Rules of Origin).
3. A PSR of origin set out in this Appendix represents the minimum amount of working or processing required to be carried out on non-originating materials for the final product to achieve originating status. A greater amount of working or processing than that required by the rule shall also confer originating status.
4. If a PSR in the list specifies that a product may be manufactured from more than one material, any one or more materials may be used. It does not require that all be used.
5. If a PSR in the list specifies that a product must be manufactured from a particular material, the condition does not prevent the use of other materials in addition.
6. If a PSR excludes materials classified in certain chapters, headings, or sub-headings, such materials must be originating for the products to qualify as originating.
7. If a product, which has acquired originating status by fulfilling the conditions set out in the list, is used as material in the manufacture of another product, the conditions applicable to the final product do not apply to that material. No account shall be taken of the non-originating components of that material.
8. If a PSR uses the expression “Manufacture from materials of any heading”, then materials of any heading, even materials of the same description and heading as the final product may be used, subject to any specific limitations which may also be contained in the PSR.
9. The products mentioned in the list do benefit from preferential treatment, subject to the market access schedules.
10. If a PSR provides that “Manufacture in which the value of all non-originating materials used does not exceed X% of the ex-works price of the product,” no change in

tariff classification is required. The value criterion shall be computed as follows: (value of non-originating materials/ex-works price) x 100.

SECTION II

Note referring to chapters 27 to 40

1. If a substantial transformation of a molecule has occurred, the origin of the product concerned shall correspond to the Party where that transformation took place.
2. The main method for determination of origin should normally be the rule of Change in Tariff Classification. If that rule cannot be applied, one or more of the following alternative approaches may be applied:
 - (a) chemical reaction;
 - (b) mixing and blending;
 - (c) purification;
 - (d) change in particle size;
 - (e) standard materials;
 - (f) isomer separation.
3. For the purposes of paragraph 2:
 - (a) “chemical reaction” means a process, including a biochemical process, which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of the molecule. A chemical reaction may also be expressed by a change of the “CAS number”. It does not mean:
 - (i) dissolving in water or other solvents;
 - (ii) elimination of solvents including solvent water; or
 - (iii) addition or elimination of water of crystallisation.
 - (b) “mixing and blending” means, for the purposes of chapters 30 to 32, heading 33.02, subheading 3502.20, headings 35.06 to 35.07, headings 37.07, 38.08 and 38.22: deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications which results in the production of a product having physical or chemical characteristics which are relevant to the purposes or uses of the product and are different from the input materials.
 - (c) “purification” means, for the purposes of chapters 28 to 35 and chapter 38
 - (i) purification of a product resulting in the elimination of 80 % of the content of existing impurities; or
 - (ii) reduction or elimination of impurities resulting in a product suitable for one or more of the following applications:

- (aa) pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances;
 - (bb) chemical products and reagents for analytical, diagnostic or laboratory uses;
 - (cc) elements and components for use in micro-elements;
 - (dd) specialised optical uses;
 - (ee) non-toxic uses for health and safety;
 - (ff) biotechnical use;
 - (gg) carriers used in a separation process; or
 - (hh) nuclear grade uses.
- (d) “change in particle size” means, for the purposes of chapters 30 to 32 and heading 38.22: deliberate and controlled modification in particle size of a product, other than by merely crushing or pressing, resulting in a product having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting product and have different physical or chemical characteristics from the input materials.
- (e) “standard materials”, for the purposes of chapters 28 to 32, chapter 35 and chapter 38: production of preparations suitable for analytical, calibrating or referencing uses having precise degrees of purity or proportions which are certified by the manufacturer.
- (f) “isomer separation” means, for the purposes of chapters 28 to 32 and chapter 35: isolation or separation of isomers from a mixture of isomers.

ANNEX IV

REFERRED TO IN ARTICLE 2.2

SCHEDULE OF TARIFF COMMITMENTS ON GOODS COMMITMENTS OF NORWAY ON GOODS ORIGINATING IN THAILAND

ANNEX IV

REFERRED TO IN ARTICLE 2.2

SCHEDULE OF TARIFF COMMITMENTS ON GOODS

COMMITMENTS OF NORWAY ON GOODS ORIGINATING IN THAILAND

The following terms and conditions apply to the tariff commitments granted by Norway to Thailand in accordance with this Annex:

1. For goods originating in Thailand indicated as “NAMA” (Non-Agricultural Products) in column 3, Norway shall, upon entry into force of this Agreement, eliminate all customs duties as set out in columns 4a or 4b.
2. For goods originating in Thailand indicated as “BAP” (Basic Agricultural Products) in column 3, Norway shall apply customs duties as set out in columns 4a or 4b.
3. For goods originating in Thailand indicated as “PAP” (Processed Agricultural Products) in column 3, Norway shall apply customs duties as set out in columns 4a or 4b. The following provisions apply:
 - (a) In order to take account of differences in the cost of the agricultural raw materials, the duty, levied upon import, shall be based on, but not exceed, the differences between the domestic price in Norway and the world market price of the agricultural raw materials incorporated into the goods concerned.
 - (b) Subject to the provisions in subparagraph (a), Norway shall accord for goods indicated as PAP in column 3 of the table, originating in Thailand, the same treatment as given to the European Union (EU). The commitments set out in the table for PAP are the same concessions as granted to the EU. If the commitments for these goods are changed in the agreement between Norway and the EU¹, Thailand will simultaneously get identical commitments.
 - (c) Norway shall publish the applicable import duties for processed agricultural products on the Website of the EFTA Secretariat.
4. For goods indicated as “NC” (No Commitment) in columns 4a or 4b, no commitments related to customs duties are granted by Norway.
5. The classification of goods shall be that set out in the tariff nomenclature of Norway in conformity with the Harmonized Commodity Description and Coding System

¹ Protocol 3 to the Agreement on the European Economic Area

* = For processed agricultural products (PAP) marked with "**", Norway calculates the duty based on the actual content of certain agricultural raw materials. See paragraph 3 of the Cover Note.

in its 2022 version as set out in Article 2.6 (Classification of Goods and Transposition of Schedules).

6. Norway shall, based on an end-use criteria, exempt fish feed and raw materials for making fish feed from customs duties, originating in Thailand.

**DECLARATION BY NORWAY ON THE GSP SYSTEM
FOR AGRICULTURAL PRODUCTS**

Recalling that Norway historically has granted improved market access for developing countries, Norway will maintain its GSP-system for Thailand, on an autonomous basis, in parallel to the Agreement for all agricultural products.
Norway commits to grant Thailand GSP-preferences as long as Thailand is on the OECDs DAC List of ODA recipients and part of the Norwegian GSP-system.

* = For processed agricultural products (PAP) marked with "*", Norway calculates the duty based on the actual content of certain agricultural raw materials. See paragraph 3 of the Cover Note.

3. For goods originating in Thailand indicated as “PCM” (Price Compensation Mechanism) in column 5:

4. For tariff concessions in column 6, Switzerland shall reduce the MFN duty rate applicable at the time of importation by the amount specified in that column.

TRADE FACILITATION

ANNEX VI

REFERRED TO IN ARTICLE 2.11

TRADE FACILITATION

ARTICLE 1

General Principles

1. The Parties, aiming to serve the interests of their respective business communities and to create a trading environment allowing them to benefit from the opportunities offered by the Agreement, agree that in particular the following principles are the basis for the development and administration of trade facilitation measures by their competent authorities:

- (a) transparency, efficiency, simplification, harmonisation and consistency of trade procedures;
- (b) consistent, impartial, predictable and reasonable administration of international laws and domestic laws, regulations and administrative decisions relevant to international trade in goods;
- (c) promotion of international standards;
- (d) consistency with multilateral instruments;
- (e) best possible use of information technology;
- (f) high standards of public service;
- (g) governmental controls based on risk management;
- (h) cooperation within each Party among customs and other border authorities; and
- (i) consultations between the Parties and their respective business communities.

2. Nothing in this Annex shall be construed as to diminish the rights and obligations of the Parties under Chapter 3 (Technical Barriers to Trade) and Chapter 4 (Sanitary and Phytosanitary Measures) of the Agreement.

ARTICLE 2

WTO Agreement on Trade Facilitation

For the purposes of Chapter 2 (Trade in Goods) of the Agreement, the WTO Agreement on Trade Facilitation applies and is hereby incorporated into and made part

of the Agreement, mutatis mutandis. In addition, the measures provided for in this Annex shall apply.

ARTICLE 3

Transparency

1. Each Party shall, without unnecessary delay, make available, as far as practicable in English, on the internet:
 - (a) all domestic laws and regulations and administrative decisions of general application, relevant to trade in goods; and
 - (b) a description of its trade procedures that informs interested parties of the practical steps needed to trade or transit goods, including contact information on enquiry points.
2. Each Party shall maintain enquiry points for customs matters, which may be contacted in English through the internet. Enquiries in English shall be answered in English.
3. Each Party shall endeavour to establish enquiry points for other matters relevant to trade in goods, which may be contacted in English through the internet. Enquiries in English shall be answered in English, to the extent possible.
4. The Parties shall not require any fee for answering enquiries.

ARTICLE 4

Public Consultation and Information Before Entry into Force

1. Each Party shall consult its business community on its needs with regard to the development and implementation of trade facilitation measures.
2. Each Party shall publish in advance, and on the internet, any proposed domestic laws and regulations relevant to trade in goods, with a view to affording interested persons an opportunity to comment on them.
3. Each Party shall ensure that a reasonable time period is provided between the publication of domestic laws and regulations relevant to trade in goods and their entry into force.
4. Paragraphs 1 to 3 shall not apply to:
 - (a) measures having a relieving effect;
 - (b) measures, the effectiveness of which would be undermined as a result of compliance with paragraphs 1 to 3;
 - (c) measures applied in urgent circumstances; and

- (d) minor changes to domestic laws and regulations not affecting the trade flow.

ARTICLE 5

Advance Rulings

1. Each Party shall, prior to the importation of a product, in a reasonable time bound manner, issue a written advance ruling to an importer, exporter, or any person with a justifiable cause, or a representative thereof, who has submitted a written request containing all necessary information. An advance ruling shall be issued with regard to:

- (a) tariff classification; including information on where to find the applied rate of duty of a product, and the unit of calculation for the duties;
- (b) the appropriate method or criteria and the application thereof, to be used for determining the customs value under the facts presented by the applicant;¹
- (c) applicable rules of origin; and
- (d) other matters as the Parties may agree.

2. Each Party shall endeavour to make information on advance rulings publicly available, taking into account the need to protect confidential information

ARTICLE 6

Procedures for Appeal

Each Party shall ensure that any person to whom customs or another border authority issues an administrative decision has the right to at least:

- (a) an administrative appeal to an authority higher than or independent of the official or office that issued the decision, unless the administrative decision has been taken by the highest administrative entity; and
- (b) one level of independent judicial appeal.

ARTICLE 7

Fees and Charges

1. Fees and charges of whatever character, other than import duties and other than taxes in accordance with Article III of the GATT 1994, imposed in connection with importation, exportation or transit, including tasks provided under Article 5 (Advance Rulings), shall be limited in amount to the approximate cost of services rendered and shall

¹ Switzerland applies customs duties based on weight or quantity rather than *ad valorem* duties.

not represent an indirect protection of domestic goods or a taxation of imports or exports for fiscal purposes.

THAILAND – SCHEDULE OF SPECIFIC COMMITMENTS

EXPLANATORY NOTES

1. This Schedule sets out Thailand's commitments in accordance with Article 5.18 (Schedules of Specific Commitments).
2. The classification of service sectors in this schedule is based on the 1991 provisional Central Product Classification (CPC) and CPC Version 1.1 of the United Nations Statistical Office unless otherwise indicated by the absence of a CPC number. The ordering reflects the services sectoral classification list as used in the GATT document MTN.GNS/W/120 dated 10 July 1991. The scheduling of specific commitments follows the guidelines stated in GATT documents MTN.GNS/W/164 dated 3 September 1993 and MTN.GNS/W/164/Add.1 dated 30 November 1993.
3. The use of "***" against individual CPC codes indicates that the specific commitment for that code shall not extend to the total range of services covered under that code. The entry "Unbound*" means unbound due to the lack of technical feasibility.

ATTACHEMENT I

UNDERSTANDING ON THE SCOPE OF COVERAGE OF CPC 84-COMPUTER AND RELATED SERVICE

1. CPC 84 covers all computer and related services.
2. Technological developments have led to the increased offering of these services as a bundle or package of related services that can include some or all of the basic functions listed in paragraph 3. For example, services such as web or domain hosting, data mining services and grid computing each consist of a combination of basic computer services functions.
3. Computer and related services, regardless of whether they are delivered via a network, including the Internet, include all services that provide any of the following or any combination thereof:
 - consulting, adaptation, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, support, technical assistance, or management of or for computers or computer systems;
 - consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, adaptation, maintenance, support, technical assistance, management or use of or for software;⁴
 - data processing, data storage, data hosting or database services;
 - maintenance and repair services for office machinery and equipment, including computers; and
 - training services for staff of clients, related to software, computers or computer systems, and not elsewhere classified.
4. In many cases, computer and related services enable the provision of other services⁵ by both electronic and other means. However, in such cases, there is an important distinction between the computer and related service (*e.g.*, web-hosting or application hosting) and the other service² enabled by the computer and related service. The other service, regardless of whether it is enabled by a computer and related service, is not covered by CPC 84.

⁴ The term “software” may be defined as the sets of instructions required to make computers work and communicate. A number of different programmes may be developed for specific applications (application software), and the customer may have a choice of using ready-made programmes off the shelf (packaged software), developing specific programmes for particular requirements (customized software) or using a combination of the two.

“Reasonable and non-discriminatory terms and conditions” means, for the purposes of multimodal transport operations, the ability of the multimodal transport operator to arrange for the conveyance of its merchandise on a timely basis, including priority over other merchandise which has entered the port at a later date.

A “Multimodal transport operator” means the person on whose behalf the bill of lading/multimodal transport document, or any other document evidencing a contract of multimodal carriage of goods, is issued and who is responsible for the carriage of goods pursuant to the contract of carriage.

(1) “Domestic transport” is defined as maritime transport of goods and passengers between ports in Norway, including locations on the continental shelf where petroleum is explored or produced.

(2) “Other forms of commercial presence for the supply of international maritime transport services” means the ability for international maritime transport service suppliers of the other members to undertake locally all activities which are necessary for the supply to their customers of a partially or fully integrated transport service, within which the maritime transport constitutes a substantial element. (This commitment shall however not be construed as limiting in any manner the commitments undertaken under the cross-border mode of delivery).

These activities include, but are not limited to:

- (a) marketing and sales of maritime transport and related services through direct contact with customers, from quotation to invoicing, these services being those operated or offered by the service supplier itself or by service suppliers with which the service seller has established standing business arrangements;

- (f) acting on behalf of the companies, organising the call of the ship or taking over cargoes when required.

(3) “Maritime cargo handling services” means activities exercised by stevedore companies, including terminal operators, but not including the direct activities of dockers, when this workforce is organised independently of the stevedoring or terminal operator companies. The activities covered include the organisation and supervision of:

- the loading/discharging of cargo to/from a ship;
- the lashing/unlashing of cargo;
- the reception/delivery and safekeeping of cargoes before shipment or after discharge.

(4) “Customs clearance services” (alternatively “customs house brokers’ services”) means activities consisting in carrying out on behalf of another party customs formalities concerning import, export or through transport of cargoes, whether this service is the main activity of the service provider or a usual complement of its main activity.

(5) “Container station and depot services” means activities consisting in storing containers, whether in a port area or inland, with a view to their stuffing/stripping, repairing, and making them available for shipments.

(6) “Maritime agency services” means the activities consisting in representing, within a given geographic area, as an agent the business interests of one or more shipping lines or shipping companies, for the following purposes:

- marketing and sales of maritime transport and related services, from quotation to invoicing, and issuance of bills of lading on behalf of the companies; acquisition and resale of the necessary related services, preparation of documentation, and provision of business information;

 - (ii) at the request of the applicant, identify the additional information required to complete the application, or otherwise provide guidance on why the application is considered incomplete; and
 - (iii) provide the applicant with the opportunity²¹ to provide the additional information that is required to complete the application;

however, if none of the above is practicable, and the application is rejected due to incompleteness, ensure that they so inform the applicant within a reasonable period of time; and

¹⁸ Competent authorities may require that all information is submitted in a specified format to consider it "complete for processing".

¹⁹ Competent authorities may meet this requirement by informing an applicant in advance in writing, including through a published measure, that lack of response after a specified period of time from the date of submission of an application indicates acceptance of the application or rejection of the application.

²⁰ "In writing" may include in electronic form.

²¹ Such opportunity does not require a competent authority to provide extensions of deadlines.

- (f) if an application is rejected, to the extent practicable, either upon their own initiative or upon request of the applicant, inform the applicant of the reasons for rejection and, if applicable, the procedures for resubmission of an application; an applicant should not be prevented from submitting another application²² solely on the basis that an application had been previously rejected.

ARTICLE 20

²² Competent authorities may require that the content of such an application has been revised.

²³ Competent authorities are not responsible for delays due to reasons outside their competence.

²⁴ Authorisation fees do not include fees for the use of natural resources, payments for auction, tendering or other non-discriminatory means of awarding concessions, or mandated contributions to universal service provision.

²⁵ For greater certainty, this provision does not mandate a particular administrative structure; it refers to the decision-making process and administering of decisions.

ARTICLE 22

Publication and Information available

If a Party requires authorisation for the supply of a service, further to Article 5.10 (Transparency) of Chapter 5 (Trade in Services) and paragraph 1 of the Articles 18 (Processing of Applications) and 19 (Fees) of this Section II (Services Domestic Regulation for Financial Services), the Party shall promptly publish,²⁶ or otherwise make publicly available in writing the information necessary for service suppliers or persons seeking to supply a service to comply with the requirements and procedures for obtaining, maintaining, amending and renewing such authorisation. Such information shall include, *inter alia*, where it exists:

- (a) domestic laws and regulations of general application it proposes to adopt in relation to matters falling within the scope of paragraph 1 of the Article 15 (Scope) of this Section II (Services Domestic Regulation for Financial Services); or
- (b) documents that provide sufficient details about such a possible new domestic law or regulation to allow interested persons and other Parties to assess whether and how their interests might be significantly affected.

2. To the extent practicable and in a manner consistent with its legal system for adopting measures, each Party is encouraged to apply paragraph 1 of this Article to procedures and administrative rulings of general application it proposes to adopt in

²⁶ For purposes of these disciplines, "publish" means to include in an official publication, such as an official journal, or on an official website. Parties are encouraged to consolidate electronic publications into a single portal.

²⁷ Paragraphs 1 to 4 recognise that Parties have different systems to consult interested persons and other Parties on certain measures before their adoption, and that the alternatives set out in paragraph 1 reflect different legal systems.

relation to matters falling within the scope of paragraph 1 of Article 15 (Scope) of this Section II (Services Domestic Regulation for Financial Services).

6. Each Party shall, to the extent practicable, endeavour to allow reasonable time between publication of the text of a domestic law or regulation referred to in subparagraph 1 (a) of this Article, and the date on which service suppliers must comply with the domestic law or regulation.

ARTICLE 24

Each Party shall maintain or establish appropriate mechanisms for responding to enquiries from service suppliers or persons seeking to supply a service regarding the measures referred to in paragraph 1 of the Article 15 (Scope) of this Section II (Services Domestic Regulation for Financial Services).²⁹

ARTICLE 25

Development of Measures

If a Party adopts or maintains measures relating to the authorisation for the supply of a service, the Party shall ensure that:

- (a) such measures are based on objective and transparent criteria;³⁰

²⁸ This provision is without prejudice to the final decision of a Party that adopts or maintains any measure for authorisation for the supply of a service.

²⁹ It is understood that resource constraints may be a factor in determining whether a mechanism for responding to enquiries is appropriate.

³⁰ Such criteria may include, *inter alia*, competence and the ability to supply a service, including to do so in a manner consistent with a Party's regulatory requirements. Competent authorities may assess the weight to be given to each criterion.

- (b) the procedures are impartial, and that the procedures are adequate for applicants to demonstrate whether they meet the requirements, if such requirements exist;
 - (c) the procedures do not in themselves unjustifiably prevent fulfilment of requirements; and
 - (d) such measures do not discriminate between men and women.³¹
-

³¹ Differential treatment that is reasonable and objective, and aims to achieve a legitimate purpose, and adoption by Parties of temporary special measures aimed at accelerating *de facto* equality between men and women, shall not be considered discrimination for the purposes of this provision.

ARTICLE 4

Genetic Resources and Traditional Knowledge⁴

1. Subject to its international rights and obligations under agreements to which each Party is or may become a party, such as the Convention on Biological Diversity, the Nagoya Protocol on Access to Genetic Resources and the Fair and Equitable Sharing of Benefits Arising from their Utilization, the International Treaty on Plant Genetic Resources for Food and Agriculture, and the WIPO Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge, each Party may establish appropriate measures⁵ to protect genetic resources, traditional knowledge, and traditional cultural expressions, considering, as applicable and appropriate, the close and traditional dependence on genetic resources of subsistence farmers, indigenous peoples and local communities embodying traditional lifestyles, and the potential role of the patent system in contributing to the protection of genetic resources and traditional knowledge associated with genetic resources.

SECTION II

STANDARDS CONCERNING THE AVAILABILITY, SCOPE AND USE OF

INTELLECTUAL PROPERTY RIGHTS

ARTICLE 5

Copyright and Related Rights

1. The Parties shall, without prejudice to the obligations set out in the international agreements to which they are parties, in accordance with their domestic laws and regulations, grant and ensure adequate and effective protection to the authors of works and to performers, to producers of phonograms and to broadcasting organisations for their works, performances, phonograms, and broadcasts, respectively.

2. In addition to the protection provided for in paragraph 1, in accordance with its domestic laws and regulations, each Party shall grant and ensure protection for audiovisual producers by providing the exclusive right of authorising the following acts:

- (a) the reproduction of their audiovisual fixations in any manner or form;
- (b) the making available to the public of the original and copies of their audiovisual fixations through sale or other transfer of ownership (distribution right);
- (c) the commercial rental to the public of the original and copies of their audiovisual fixations; and
- (d) the making available to the public of their fixations, by wire or wireless means, in such a way that members of the public may access them from a place and at a time individually chosen by them.

3. Notwithstanding paragraph 2, a Party may provide for the right to obtain an equitable remuneration instead of an exclusive right of authorising commercial rental to the public, provided that such commercial rental is not giving rise to the material impairment of the exclusive rights of reproduction.

4. The Parties shall ensure that a broadcasting organisation has at least the exclusive right of authorising the following acts: the rebroadcasting of their broadcasts, the fixation of their broadcasts, the reproduction and distribution of their fixations, and the communication to the public, by wire or wireless means, including the retransmission and the making available to the public of their fixed broadcasts in such a way that members of the public may access these broadcasts from a place and at a time individually chosen by them.

5. The Parties may, in their domestic laws and regulations, provide for the same kinds of limitations and exceptions with regard to the protection of performers for their performances, producers of phonograms and audiovisual producers as well as of

broadcasting organisations as they provide for, in their domestic laws and regulations, in connection with the protection of copyright in literary and artistic works.

6. The term of protection for audiovisual fixations under the Agreement shall last at least 50 years from the end of the year in which the audiovisual fixation was published, or failing such publication within 50 years from the fixation, 50 years from the end of the year in which the fixation was made.

7. The term of protection to be granted to broadcasting organisations under the Agreement shall last at least 20 years from the end of the year in which the broadcast took place.

ARTICLE 6

Trademarks

1. The Parties shall grant adequate and effective protection of trademarks for goods and services. Any sign, or any combination of signs, capable of distinguishing the goods or services of one undertaking from those of other undertakings, shall be capable of constituting a trademark. Such signs, in particular words including combinations of words, personal names, letters, numerals, figurative elements, three-dimensional shapes, sounds and combinations of colours as well as any combination of such signs, shall be eligible for registration as trademarks. Where signs are not inherently capable of distinguishing the relevant goods or services, the Parties may make registrability depend on distinctiveness acquired through use. The Parties may require, as a condition of registration, that trademarks are capable of being represented on the register in a manner which enables the competent authorities and the public to determine the clear and precise subject matter of the protection afforded to its proprietor.

2. The Parties shall grant the owner of a registered trademark the exclusive right to prevent all third parties not having the owner's consent from using in the course of trade identical or similar signs for goods or services which are identical or similar to those in respect of which the trademark is registered where such use would result in a likelihood of confusion. In case of the use of an identical sign for identical goods or services, a likelihood of confusion shall be presumed. The rights described above shall not prejudice any existing prior rights, nor shall they affect the possibility of Parties making rights available on the basis of use.

3. Protection according to paragraph 2 shall not be limited to identical or similar goods or services where the trademark is well-known in the relevant country if the use of the sign is likely to cause confusion with the well-known trademark, or if the use of the sign would indicate a connection between the goods and services the sign is used for and the owner of the well-known trademark, and the interests of the owner of the well-known trademark are likely to be damaged by such use. Factors to be taken into consideration when assessing cases of likelihood of damage under this paragraph may include whether the use of the sign is detrimental to the repute or distinctiveness or takes unfair advantage of the well-known trademark or whether the sign is used in bad faith.

4. No Party may require as a condition for determining that a trademark is well-known that the trademark has been registered in that Party or in another jurisdiction,

included on a list of well-known trademarks, or given prior recognition as a well-known trademark.

5. The Parties recognise the importance of the WIPO Joint Recommendation Concerning Provisions on the Protection of Well-Known Marks, adopted by the Assembly of the Paris Union for the Protection of Industrial Property and the General Assembly of the WIPO in 1999, and the WIPO Joint Recommendation Concerning Provisions on the Protection of Marks and other Industrial Property Rights in Signs, on the Internet, adopted by the Assembly of the Paris Union for the Protection of Industrial Property and the General Assembly of the WIPO in 2001.

ARTICLE 7

Patents

1. The Parties shall ensure in their domestic laws and regulations that patents are available for any inventions, whether products or processes, in all fields of technology, provided that they are new, involve an inventive step and are capable of industrial application. Subject to paragraphs 3 and 4, patents shall be available and patent rights enjoyable without discrimination as to the place of invention, the field of technology and whether products are imported or locally produced. Importation of a patent-protected product in a Party shall, on its own, not be considered as failure to work the patent in that Party. This paragraph shall be without prejudice to the right of the Parties to take appropriate measures, provided that such measures are consistent with the provisions of the TRIPS Agreement, to prevent the abuse which might result from the exercise of the exclusive right conferred by a patent.⁶

2. Each Party may exclude from patentability inventions, the prevention within their territory of the commercial exploitation of which is necessary to protect ordre public or morality, including to protect human, animal or plant life or health or to avoid serious prejudice to the environment, provided that such exclusion is not made merely because the exploitation is prohibited by their domestic laws and regulations.

3. Each Party may also exclude from patentability:

- (a) any invention of diagnostic, therapeutic, and surgical methods for treatment of humans or animals; this subparagraph shall not apply to products, in particular substances or compositions, for use in any of these methods; and
- (b) plants or animals or essentially biological processes for the production of plants or animals; this subparagraph shall not apply to microbiological processes or the products thereof.

⁶ This Annex shall be without prejudice to the rights and obligations set out in Articles 31 and 31bis of the TRIPS Agreement.

4. The Parties shall provide a patent applicant with the opportunity to make amendments, corrections, and observations in connection with its application.

5. Recognising the benefits of transparency in the patent system, the Parties shall endeavour to publish unpublished pending patent applications promptly after the expiration of 18 months from the filing date or, if priority is claimed, from the priority date.

6. If a pending patent application is not published promptly in accordance with paragraph 5, the Parties shall publish such application or the corresponding patent as soon as practicable.

7. The Parties shall provide that a patent applicant may request the early publication of an application prior to the expiration of the period mentioned in paragraph 5.

8. Each Party may provide limited exceptions to the exclusive rights conferred by a patent, provided that such exceptions do not unreasonably conflict with a normal exploitation of the patent and do not unreasonably prejudice the legitimate interests of the patent owner, taking account the legitimate interest of third parties.

9. The Parties recognise the importance of providing efficient procedures for grant of patents, and to this end, each Party shall continue to review and endeavour, where appropriate, to make improvements to its relevant procedures. Where a Party provides for a process that allows a third party to oppose a patent application prior to its grant, it shall ensure that the opposed patent application is processed within a reasonable period of time and without undue delay.

ARTICLE 8

Plant Variety Protection

The Parties recognise the importance of protecting new varieties of plants and shall endeavour to provide for adequate and effective protection of new plant varieties by an effective sui generis system.

ARTICLE 9

Undisclosed Information

1. In the course of ensuring effective protection against unfair competition as provided in Article 10bis of the Paris Convention (1967), each Party shall protect undisclosed information in accordance with paragraph 2 and data submitted to governments or governmental agencies in accordance with paragraph 3.

2. Natural and legal persons shall have the possibility of preventing information lawfully within their control from being disclosed to, acquired by, or used by others

without their consent in a manner contrary to honest commercial practices⁷ so long as such information:

- (a) is secret in the sense that it is not, as a body or in the precise configuration and assembly of its components, generally known among or readily accessible to persons within the circles that normally deal with the kind of information in question;
- (b) has commercial value because it is secret; and
- (c) has been subject to reasonable steps under the circumstances, by the person lawfully in control of the information, to keep it secret.

3. Each Party, when requiring, as a condition of approving the marketing of pharmaceutical or of agricultural chemical products which utilize new chemical entities, the submission of undisclosed test or other data, the origination of which involves a considerable effort, shall protect such data against unfair commercial use. In addition, each Party shall protect such data against disclosure, except where necessary to protect the public, or unless steps are taken to ensure that the data are protected against unfair commercial use.

4. Upon request of a Party, the Parties agree to enter into consultations, one year after entry into force of the Agreement, to discuss issues relating to protection of undisclosed information from unfair commercial use.

ARTICLE 10

Industrial Designs

The Parties shall ensure in their domestic laws and regulations adequate and effective protection of industrial designs by providing in particular a period of protection of at least ten years in total. Each Party may foresee that the right holder may have the term of protection renewed for one or more periods of five years each, up to the maximum term of protection established in its domestic laws and regulations.⁸

ARTICLE 11

Geographical Indications

1. The Parties shall ensure in their domestic laws and regulations adequate and effective means to protect geographical indications with regard to all goods.

⁷ For the purpose of this provision, "a manner contrary to honest commercial practices" shall mean at least practices such as breach of contract, breach of confidence and inducement to breach, and includes the acquisition of undisclosed information by third parties who knew, or were grossly negligent in failing to know, that such practices were involved in the acquisition.

⁸ The Parties take note that Norway provides for a shorter period of protection for designs of component parts used for the purpose of the repair of a product.

2. For the purposes of this Annex, “geographical indications” means indications which identify a good as originating in the territory of a Party, or a region or locality in that territory, where a given quality, reputation or other characteristic of the good is essentially attributable to its geographical origin.

3. Without prejudice to Article 23 of the TRIPS Agreement, the Parties shall provide legal means for interested parties to prevent the use of a geographical indication for goods not originating in the place indicated by the designation in question in a manner which misleads the public as to the geographical origin of those goods or which constitutes an act of unfair competition within the meaning of Article 10*bis* of the Paris Convention.

4. The Parties shall provide legal means for interested parties to oppose the registration or to request the invalidation of a trademark which contains or consists of a geographical indication of a Party with respect to goods not originating in the territory indicated, if the said trademark misleads the public as to the true place of origin of the goods.

5. The Parties shall endeavour to provide legal means for interested parties to prevent the use of a geographical indication for agricultural products and foodstuffs for identical or comparable goods⁹ not originating in the place indicated by the designation in question.

6. If, at the time of the entry into force of the Agreement or thereafter, a Party, in the context of an international agreement with a non-Party, grants to that non-Party protection of specific geographical indications contained in a list included in that international agreement, the Parties shall, upon request from another Party:¹⁰

- (a) enter into discussions within the Joint Committee with a view to protect under this Agreement specific geographical indications by means of lists;¹¹ and
- (b) commence such discussions as soon as reasonably practicable after a request has been received, and in any event, no later than two years after the request is received.¹²

⁹ For the purposes of this paragraph, “comparable goods” may be interpreted as “goods of the same kind”.

¹⁰ The Parties understand that this paragraph is not triggered by registration and protection of a geographical indication of a Party through domestic administrative procedures of another Party.

¹¹ The Parties understand that this is without prejudice to the outcome of the discussions.

¹² For the purposes of paragraph 6, the Parties, or a Party, means Thailand on the one side and Switzerland and Liechtenstein on the other side.

ARTICLE 12

Indications of Source, Country Names and State Emblems¹³

1. The Parties shall ensure in their domestic laws and regulations adequate and effective means to protect indications of source, names, armorial bearings and flags of countries, with regard to all goods and services.
2. Indications of source shall be understood in accordance with the Paris Convention.
3. The Parties shall provide the legal means for interested persons to prevent:
 - (a) commercial use of country names in relation to a good in a manner that misleads consumers as to the geographical origin of that good;
 - (b) commercial use of a country name that misleads consumers as to the geographical origin of a service;
 - (c) commercial use of a false indication of source for goods in a manner which misleads consumers as to the geographical origin of that good; and
 - (d) any act which constitutes an act of unfair competition within the meaning of Article 10*bis* of the Paris Convention.
4. The Parties shall provide the legal means for interested parties to prevent the registration of country names of a Party as trademarks, if the use of such trademarks misleads the public as to the true place of origin. This provision applies even if the geographical name is translated or used in a modified form if such use misleads the public as to the true place of origin of the goods or services. Alternatively, a Party shall prohibit the registration of country names as trademarks, unless their registration is authorised by the competent authority of the concerned Party.¹⁴
5. The Parties, in accordance with their obligations under Article 6*ter* of the Paris Convention, shall prevent that armorial bearings, flags and other State emblems of a Party are used or registered as trademarks or as elements of trademarks in non-compliance with the conditions laid down in the domestic laws and regulations of that Party.

¹³ For greater certainty, the Parties understand that obligations under this Article may be addressed within different areas of their domestic laws and regulations including, but not limited to, the areas of trademarks or consumer protection.

¹⁴ In the case of Switzerland, an authorisation for the registration of its country name or territory names as trademarks is considered valid if explicitly issued by the competent authority.

SECTION III
ACQUISITION AND MAINTENANCE OF INTELLECTUAL PROPERTY
RIGHTS

ARTICLE 13

Acquisition and Maintenance

Where the acquisition of an intellectual property right is subject to the right being granted or registered, the Parties shall ensure that the procedures for granting or registration are at least the same level as that provided in the TRIPS Agreement, in particular Article 62.

SECTION IV
ENFORCEMENT OF INTELLECTUAL PROPERTY RIGHTS

ARTICLE 14

General

The Parties shall provide in their domestic laws and regulations for enforcement provisions for intellectual property rights covered by Article 1 (Scope) that shall at least be the same level as provided for in the TRIPS Agreement, in particular Articles 41 to 61. The Parties shall provide in their domestic laws and regulations for adequate and effective enforcement of rights related to the protection of indications of source.

ARTICLE 15

Suspension of Release

1. Each Party shall adopt procedures to enable a right holder, who has valid grounds for suspecting that importation or exportation of goods infringing their trademarks or copyrights may take place, to lodge an application in writing with the competent authorities, administrative or judicial, for the suspension of the release of such goods.
2. With respect to other intellectual property rights outside the scope of paragraph 1, a Party shall either ensure that the procedure is available to a right holder as set out therein, or alternatively provide for adequate and effective measures, including criminal remedies, to prevent the entry of goods suspected of infringing intellectual property rights into channels of commerce, subject to its domestic laws and regulations.
3. Each Party shall also adopt procedures with respect to goods for import or export, under which a right holder can record their trademarks or copyrights with the customs authorities, for the purpose of ensuring appropriate controls in order to identify goods suspected of infringing those recorded rights.
4. Each Party shall enable its competent authorities to act upon their own initiative to suspend the release of goods when they have valid grounds for suspecting that importation or exportation of those goods would infringe trademarks or copyrights.
5. To facilitate effective enforcement procedures at import and export, the customs authorities may use appropriate measures, such as the carrying out of risk-based controls to target and identify goods suspected of infringing trademarks or copyrights.
6. It is understood that there shall be no obligation to apply procedures set forth in this Article to the suspension of the release of goods put on the market by or with the consent of the right holder, or to goods in transit.
7. In case of suspension pursuant to paragraph 1, the competent authorities of the Party suspending the release of the goods shall notify the right holder of the suspension including, where applicable, the necessary information to enforce his or her rights, such

as the nature and quantity, as well as the country of origin of the goods in question, subject to the domestic laws and regulations, of the Party, pertaining to the confidentiality of information, personal data protection, and privacy.

8. Each Party shall ensure that the competent administrative or judicial authorities, upon request by the right holder, have the authority to decide that the products, the release of which has been suspended pursuant to this Article, shall be held seized until a final decision is reached.

9. In cases where a right holder has incurred costs and expenses in connection with the exercise of rights and remedies provided in this Article, each Party shall provide for procedures¹⁵ to enable the right holder to seek recovery of, and indemnify against, such costs and expenses, provided that the competent authorities have made a determination that the suspected goods infringe an intellectual property right.

10. Each Party may exclude small quantities of goods of a non-commercial nature contained in travellers' personal luggage or sent in small consignments from the application of this Article. If a Party excludes small consignments from the application of this Article, this exclusion shall not apply to small consignments that amount to import or export on a commercial scale.

ARTICLE 16

Right of Inspection

1. The competent authorities of a Party shall provide the applicant for the suspension of goods and other persons involved in the suspension with the opportunity to inspect goods whose release has been suspended, in accordance with the Party's domestic procedures.

2. When examining goods, the competent authorities may take samples and, where appropriate, allow the right holder to have access to such samples for the purpose of analysis and of facilitating the subsequent procedure in accordance with the domestic procedures of the Party concerned.

3. The declarant, holder or owner of the suspected infringing goods may be present at the inspection in accordance with the domestic procedures of the Party concerned with a view to protecting its trade secrets.

ARTICLE 17

Provisional Measures

1. Each Party shall ensure that its judicial authorities have the authority to order prompt and effective provisional measures:

¹⁵ The Parties understand that the right holder may seek recovery of such costs and expenses by means of civil remedies, in accordance with the domestic laws and regulations of the Parties.

- (a) to prevent infringements of intellectual property rights from occurring, and in particular to prevent the entry of goods into channels of commerce in their jurisdiction, including imported goods immediately after customs clearance; and
- (b) to preserve relevant evidence with regard to the alleged infringement.

2. The Parties' judicial authorities shall have the authority to adopt provisional measures *inaudita altera parte* where appropriate, in particular where delay is likely to cause irreparable harm to the right holder, or where there is a demonstrable risk of evidence being destroyed. The Parties recognise the need to act expeditiously and take a decision without undue delay, upon a request for such provisional measures.

ARTICLE 18

Removal from Commerce

Each Party shall ensure that its competent judicial authorities in an infringement dispute may order, upon request of the right holder, that appropriate measures be taken with regard to goods that they have found to be infringing an intellectual property right and, in appropriate cases, with regard to materials and implements predominantly used in the creation or manufacture of those goods. Such measures shall include definitive removal from the channels of commerce or destruction. In considering a request for corrective measures, the need for proportionality between the seriousness of the infringement and the remedies ordered as well as the interests of third parties shall be taken into account.

ARTICLE 19

Civil Remedies

1. Each Party shall make available to right holders civil judicial procedures concerning the enforcement of intellectual property rights.
2. Each Party shall provide that:
 - (a) in civil judicial proceedings, its judicial authorities have the authority to order the infringer, who knowingly or with reasonable grounds to know engaged in infringing activity of intellectual property rights, to pay the right holder damages adequate to compensate for the actual injury the right holder has suffered as a result of the infringement; and
 - (b) in determining the amount of damages for intellectual property rights infringement, its judicial authorities shall have the authority to take into account, inter alia, the actual damage, lost profits, any profits made by the infringer or establishing a fair licence fee.
3. At least in cases of copyright or related right infringement and trademark counterfeiting, each Party shall provide that its judicial authorities have the authority to order the infringer who knowingly, or with reasonable grounds to know, engaged in

infringing activities to pay the right holder the infringer's profits that are attributable to the infringement. A Party may comply with this paragraph by including such profits in the calculation of damages referred to in subparagraph 2 (b).

ARTICLE 20

Criminal Remedies

The Parties shall provide for criminal procedures and penalties for wilful intellectual property rights infringements on a commercial scale.¹⁶

ARTICLE 21

Security or Equivalent Assurance

Each Party shall ensure that its competent authorities have the authority to require an applicant, in justified cases, to provide a security or equivalent assurance, sufficient to protect the defendant and the competent authorities and to prevent abuse. Such security or equivalent assurance shall not unreasonably deter recourse to these procedures. The Parties may fulfil this obligation by requiring an applicant to declare to accept liability towards the persons involved, instead of providing a security or equivalent assurance.

ARTICLE 22

Final Judicial and Administrative Decisions

The Parties shall ensure that final judicial and administrative decisions relating to intellectual property rights are:

- (a) in writing and contain the findings of fact and the reasoning or the legal basis on which the decisions are based; and
- (b) published or otherwise made publicly available in a national language in such a manner as to enable interested parties to become acquainted with them, subject to protection of confidential information.

¹⁶ Without prejudice to Article 61 of the TRIPS Agreement, a Party may comply with the obligation under this Article with regard to the infringement of geographical indications and topographies of integrated circuits by providing for the procedure for the imposition of regulatory fines, as available in its domestic legal system.

ARTICLE 23

Cooperation in the Field of Intellectual Property

1. The Parties, recognising the growing importance of intellectual property rights as a factor of social, economic and cultural development, agree to enhance cooperation in the field of intellectual property.
 2. The Parties may hold expert meetings, upon request of a Party, on activities relating to the conventions referred to in Article 2 (International Conventions) or to future international conventions on harmonisation, administration and enforcement of intellectual property rights and on activities in international organisations, such as the WTO and WIPO, as well as on relations of the Parties with non-Parties on matters concerning intellectual property.

ANNEX XIX

REFERRED TO IN ARTICLE 12.3

COOPERATION ON FISHERIES AND AQUACULTURE

ARTICLE 1

Objectives and Scope

1. This Annex builds upon and complements the cooperation activities and capacity-building initiatives referred to in Chapter 12 (Technical Cooperation and Capacity Building).
2. The Parties, recognising the critical role of fisheries and aquaculture in EFTA States and Thailand for economic growth, employment, food security, and sustainable development, acknowledge that cooperation in these sectors is a high priority. Technical cooperation and capacity building can strengthen industry capabilities on both sides, enhance sustainable resource management, improve competitiveness, and foster innovation.
3. The Parties express their commitment to facilitating and promoting cooperation activities and capacity-building initiatives in the fields of fisheries and aquaculture.
4. The cooperation activities under this Annex shall, in particular, strengthen the capabilities and development of the Parties' fisheries and aquaculture industries and contribute to sustainable development in alignment with national strategies and policy objectives.
5. Cooperation activities under this Annex shall encompass various aspects of fisheries and aquaculture, including aquaculture management, sustainable fisheries, branding and marketing of seafood, and research and development.

ARTICLE 2

Trade-Related Cooperation and Capacity Building Activities

1. The Parties seek to broaden cooperation and to contribute to the implementation of the Agreement by way of enhancing Thailand's implementation capacity through projects, workshops and establishing of contact points in areas where the expansion of their trade relation is of particular importance, *inter alia*:
 - (a) Aquaculture management: an introduction to the Norwegian system for aquaculture production, offering participants insight into key aspects of government regulations of aquaculture production, including risk assessment and an overview of disease monitoring systems, such as the traffic light system. The aim is to equip participants with a foundational understanding of the essential components required for a successful and

sustainable governance of marine resources. Additionally, it will cover the aquaculture value chain, providing insight into the technologies used at various stages of production. Visits to relevant research facilities may also be explored, opening opportunities to establish contact points for further cooperation.

- (b) Sustainable fisheries: an introduction to the Icelandic regulatory system, including but not limited to sustainable fisheries management based on sound scientific data, monitoring, control and implementation of fisheries management regulations and technological improvements for increasing the utilisation and value of marine resources. Participants will attend specialised seminars and site visits with an aim to improving their knowledge of fisheries management policies and new technologies in fish handling and processing.
- (c) Branding and marketing of seafood: exchange and share knowledge on how to build a sustainable seafood brand and enter into new markets. Organised by the Norwegian Seafood Council in Thailand.
- (d) Research and development: dedicated contact points may aid in facilitating contact with various fisheries and aquaculture research institutes. The goal of establishing such contact points is to facilitate potential knowledge and information sharing between the Parties.
- (e) Other activities as mutually agreed by the Parties.

ARTICLE 3

Implementation

1. The Parties shall, within one year from the entry into force of the Agreement, arrange an initial meeting to discuss and initiate potential projects under this Annex.
2. The Parties shall, within the framework of the Joint Committee, continue to develop cooperation projects under this Annex, as agreed by the Parties.
3. Projects under this Annex shall be implemented in accordance with Article 12.2 (Methods and Means) of the Agreement.
